Equitation Science Paul McGreevy, Andrew McLean. 2010-09-07 Written by two internationally recognised experts, *Equitation Science* is the first book to draw together the principles of this emerging field into a much-needed coherent source of information. The goal of equitation science is to enhance our understanding of how horses think and learn, and to use their natural behaviour to train, ride or compete with them in as fair a manner as possible. The welfare consequences of training and competing horses under different protocols are explored. Drawing on traditional and emergent techniques, this book incorporates learning theory into an ethical equine training system suitable for all levels. It also focuses on evidence-based approaches that improve rider safety.

Rembrandt's Eyes Simon Schama. 1999 For Rembrandt, as for Shakespeare, all the world was indeed a stage, and he knew in exhaustive detail the tactics of its performance: the strutting and mincing, the wardrobe and face-paint, the full repertoire and gesture and grimace, the flutter of hands and the roll of the eyes, the belly-laugh and the half-stifled sob. He knew what it looked like to seduce, to intimidate, to wheedle and to console; to strike a pose or preach a sermon, to shake a fist or uncover a breast; and how to sin and how to atone. No artist had ever been so fascinated by the fashioning of personae, beginning with his own. No painter ever looked with such unsparing intelligence or such bottomless compassion at our entrances and our exits and the whole rowdy show in between.

From Memory to Marble Elizabeth Rankin, Rolf Michael Schneider. 2020-02-10 For the first time, the 92-metre frieze of the Voortrekker Monument in Pretoria, one of the largest historical narratives in marble, has been made the subject of a book. The pictorial narrative of the Boer pioneers who conquered South Africa's interior during the 'Great Trek' (1835-52) represents a crucial period of South Africa's past. Conceptualising the frieze both reflected on and contributed to the country's socio-political debates in the 1930s and 1940s when it was made. The book considers the active role the Monument played in the rise of Afrikaner nationalism and the development of apartheid, as well as its place in post-apartheid heritage. The frieze is unique in that it provides rare evidence of the complex processes followed in creating a major monument. Based on unpublished documents, drawings and models, these processes are unfolded step by step, from the earliest discussions of the purpose and content of the frieze, through all the stages of its design, to its shipping to post-war Italy to be copied into marble from Monte Altissimo, up to its final installation in the Monument. The book examines how visual representation transforms historical memory in what it chooses to recount, and the forms in which it is depicted. The second volume expands on the first, by investigating each of the twenty-seven scenes of the frieze in depth, providing new insights into not only the frieze, but also South Africa's history. François van Schalkwyk of African Minds, co-publisher with De Gruyter writes: *From Memory to Marble* is an open access monograph in the true sense of the word. Both volumes of the digital version of the book are available in full and free of charge from the date of publication. This approach to publishing democratises access to the latest scholarly publications across the globe. At the same time, a book such as *From Memory to Marble*, with its unique and exquisite photographs of the frieze as well as its wealth of reproduced archival materials, demands reception of a more traditional kind, that is, on the printed page. For this reason, the book is likewise available in print as two separate volumes. The printed and digital books should not be seen as separate incarnations; each brings its own advantages, working together to extend the reach and utility of *From Memory to Marble* to a range of interested readers. For more material you can browse at Stanford's database *Voortrekker Monumentality: a digital archive*.

Equine Exercise Physiology David Marlin, Kathryn J. Nankervis. 2013-04-29 Equine exercise physiology is an area that has been subject to major scientific advances over the last 30 years, largely due to the increased availability of high-speed treadmills and techniques for recording physiological function during exercise. Despite these scientific advances, many riders and trainers are still using little more than experience and intuition to train their horses. The aim of this book is to sort the fact from the fiction for the benefit of those involved in training, managing or working with horses, and to provide an up-to-date summary of the state of play in equine exercise physiology. Scientific theories are explained from first principles, with the assumption that the reader has no previous scientific background. The book is designed to save competitors and trainers a lot of time and effort trying to extract information in piecemeal fashion from a host of reference sources. For the first time, everything you need to know about exercising and training horses is here in one text.

The Family Business in Tourism and Hospitality Donald Getz, Jack Carlsen, Alison Morrison. 2004-04-16 The family business is a global phenomenon, and is particularly prominent in tourism and hospitality. In many cases, the family business was developed for the purpose of facilitating personal and family goals. For example, in rural areas, farmers can use tourism as a way to generate additional income, thereby remaining in the area and retaining family property. Running a bed and breakfast establishment is a way to mix family and work. Lifestyle, locational and autonomy motives are the norm, but profit and growth-oriented entrepreneurs are also found within family businesses. This book is the first academic treatment of family business issues within the tourism and hospitality industry. It provides comprehensive assessment of ownership, management

and family-related concerns across the entire business and family life cycle. Many new international case studies of real family businesses are used to illustrate key points. The book will be of significant interest to researchers and students in tourism and hospitality, small business and entrepreneurship studies, as well as to owners and potential investors in family businesses.
