Conflict Without Casualties Nate Regier.2017-04-24 Make Conflict Your Partner for Positive Change! Clinical psychologist and transformative communication expert Dr. Nate Regier believes that the biggest energy crisis facing our world is the misuse of conflict. Most organizations are terrified of conflict, seeing it as a sign of trouble. But conflict isn't the problem, says Regier. It's all about how we use the energy. When people misuse conflict energy, it becomes drama: they struggle against themselves or each other to feel justified about their negative behavior. The cost to companies, teams, and relationships is staggering. The alternative, says Regier, is compassionate accountability: struggling with others through conflict. Discover the Compassion Cycle, an elegant model for balancing empathy, care, and transparency with boundaries, goals, and standards. Provocative, illuminating, and highly practical, this book helps us avoid the casualties of conflict through openness, resourcefulness, and persistence.

Why Diets Make Us Fat Sandra Aamodt.2016-06-07 "If diets worked, we'd all be thin by now. Instead, we have enlisted hundreds of millions of people into a war we can't win. What's the secret to losing weight? If you're like most of us, you've tried cutting calories, sipping weird smoothies, avoiding fats, and swapping out sugar for Splenda. The real secret is that all of those things are likely to make you weigh more in a few years, not less. In fact, a good predictor of who will gain weight is who says they plan to lose some. Last year, 108 million Americans went on diets, to the applause of doctors, family, and friends. But long-term studies of dieters consistently find that they're more likely to end up gaining weight in the next two to fifteen years than people who don't

diet. Neuroscientist Sandra Aamodt spent three decades in her own punishing cycle of starving and regaining before turning her scientific eye to the research on weight and health. What she found defies the conventional wisdom about dieting: ·Telling children that they're overweight makes them more likely to gain weight over the next few years. Weight shaming has the same effect on adults. ·The calories you absorb from a slice of pizza depend on your genes and on your gut bacteria. So does the number of calories you're burning right now. ·Most people who lose a lot of weight suffer from obsessive thoughts, binge eating, depression, and anxiety. They also burn less energy and find eating much more rewarding than it was before they lost weight. ·Fighting against your body's set point—a central tenet of most diet plans—is exhausting, psychologically damaging, and ultimately counterproductive. If dieting makes us fat, what should we do instead to stay healthy and reduce the risks of diabetes, heart disease, and other obesity-related conditions? With clarity and candor, Aamodt makes a spirited case for abandoning diets in favor of behaviors that will truly improve and extend our lives.
