Invertebrate Learning and Memory Randolph Menzel, Paul Benjamin. 2013-06-18 Understanding how memories are induced and maintained is one of the major outstanding questions in modern neuroscience. This is difficult to address in the mammalian brain due to its enormous complexity, and invertebrates offer major advantages for learning and memory studies because of their relative simplicity. Many important discoveries made in invertebrates have been found to be generally applicable to higher organisms, and the overarching theme of the proposed will be to integrate information from different levels of neural organization to help generate a complete account of learning and memory. Edited by two leaders in the field, *Invertebrate Learning and Memory* will offer a current and comprehensive review, with chapters authored by experts in each topic. The volume will take a multidisciplinary approach, exploring behavioral, cellular, genetic, molecular, and computational investigations of memory. Coverage will include comparative cognition at the behavioral and mechanistic level, developments in concepts and methodologies that will underlie future advancements, and mechanistic examples from the most important vertebrate systems (nematodes, molluscs, and insects). Neuroscience researchers and graduate students with an interest in the neural control of cognitive behavior will benefit, as will as will those in the field of invertebrate learning. Presents an overview of invertebrate studies at the molecular / cellular / neural levels and correlates findings to mammalian behavioral investigations Linking multidisciplinary approaches allows for full understanding of how molecular changes in neurons and circuits underpin behavioral plasticity Edited work with chapters authored by leaders in the field around the globe - the broadest, most expert coverage available Comprehensive coverage synthesizes widely dispersed research, serving as one-stop shopping for comparative learning and memory researchers

In Search of Self Mary Ann Bachman Kollenberg.2015-03-31 Author Mary Ann Bachman Kollenberg has always had a lust for adventure, and that lust has taken her all over the world. One of her dreams was to serve in the US Peace Corps. In 1992, at the age of fifty-eight, that became a reality. Kollenberg spent two years on the island of Dominica in the Caribbean where she helped preserve the environment while keeping tourism alive. Through *In Search of Self*, Kollenberg shares a collection of letters and journal entries written to family and friends during her two years as a Peace Corps volunteer in Dominica. With photos included, this memoir documents her many and varied experiences. She narrates stories of her interactions with her homestay family and the island's inhabitants as well as descriptions of the culture, the food, the beautiful island setting, and the work she did on behalf of the small country. *In Search of Self* provides insight into the feelings and emotions experienced by a Peace Corps volunteer during her service, and it offers a look at the beauty and culture of one small Caribbean island.

Pockets, Pull-Outs, and Hiding Places Jenn Mason.2005 More and more scrapbookers and paper artists are seeking clever ways to make their albums and paper projects more interesting and three-dimensional. One of the most exciting ways of accomplishing this is by adding interactive elements, such as doors that open and reveal hidden layers, and envelopes and pockets that hold secret text, personal letters, or special photos. *Pockets, Pull Outs and Hiding Places: A Guide to Interactive Scrapbooking, Memory Art and Paper Art* teaches the paper engineering techniques for making three dimensional and interactive paper tools such as vellum pockets, hinged doors that reveal mini booklets underneath. These tools are applicable to scrapbookers, memory, and paper artists at any level of experience. The tools are also adjustable enough to be used in any style of work.

The Train of Lost Things Ammi-Joan Paquette.2018-03-20 A magical story about a boy's love for his dying father and his journey to the mythic Train of Lost Things, where beloved lost objects are rescued and protected until they can be returned. Perfect for fans of *The Phantom Tollbooth*, *The Bridge to Terabithia*, and *Lost in the Sun*. Marty cherishes the extra-special birthday present his dad gave him -- a jean jacket on which he's affixed numerous buttons -- because it's a tie to his father, who is sick and doesn't have much time left. So when his jacket goes missing, Marty is devastated. When his dad tells him the story of the Train of Lost Things, a magical train that flies through the air collecting objects lost by kids, Marty is sure that the train must be real, and that if he can just find the train and get his jacket back, he can make his dad better as well. It turns out that the train is real -- and it's gone out of control! Instead of just collecting things that have been accidentally lost, the train has been stealing things. Along with Dina and Star, the girls he meets aboard the train, Marty needs to figure out what's going on and help set it right. As he searches for his jacket, and for a way to fix the train, Marty begins to wonder whether he's looking for the right things after all. And he realizes that sometimes you need to escape reality in order to let it sink in. In this achingly beautiful adventure, it is the power of memories, and the love between a father and son, that ultimately save the day. Praise for *The Train of Lost Things*: Paquette writes with compassion and a childlike sense of belief, and Marty's journey--both personal and fantastic--will speak to readers on many levels. --Booklist Marty's inner dialogue will appeal to readers of Gordon Korman, Jeff Kinney, and Dav Pilkey. --School Library Journal Marty's pain at the imminent loss of his father is keenly felt, and Paquette deftly balances the emotional weight of his fear and grief with his fantasy journey on a train flying through the universe. --Bulletin of the Center for Children's Books Kids everywhere can relate to the sorrow of losing a cherished item, giving this narrated adventure story a wide appeal [and] readers will connect with the unconditional love and hope that exists between parent and child. --School Library Connection

How to STEM Carol Smallwood, Vera Gubnitskaia. 2013-12-05 During the past few years, groups like the President's Council of Advisors on Science and Technology, Center for Education have been placing great emphasis on the significance of STEM (science, technology, engineering, and math) education. In brief, the US is seen as falling behind the rest of the world in science and technology education. In response, the curricula have been revised in many educational institutions and school districts across the country. It is clear that for STEM to be successful, other community organizations, most particularly libraries, need to be closely involved in the process. Library staff realize the importance of getting involved in STEM education, but many have difficulty finding comprehensive information that will help them plan and successfully implement STEM direction in their organization. This book is designed to meet that need. It is timely and relevant. *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* is by and for libraries who are involved in contributing efforts into advancing these subjects. It is organized in 9 parts including funding, grant writing, community partnerships, outreach, research, and examples of specific programming activities. Authors are drawn from the professional staffs of educational institutions, libraries, and non-profit organizations such as science museums. The book contains eight parts, each emphasizing a different aspect of how to succeed with STEM. Part 1 emphasizes how hands-on activities that are both fun and educational can be used to further STEM awareness. Parts 2 and 3 contain chapters on the uniting of STEM with Information Literacy. Innovative collection development ideas are discussed in Part 4 and Part 5 focuses on research and publishing. Outreach is the theme of Part 6 and the programs described in these chapters offer an array of ways to connect with students of all ages. The final section of *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* addresses the funding of these programs. Librarians of all types will be pleased to discover easy-to-implement suggestions for collaborative efforts, many rich and diverse programming ideas, strategies for improving reference services and library instruction to speakers of English as a second language, marketing and promotional tips designed to welcome multicultural patrons into the library, and much more.
