Grit Angela Duckworth. 2016-05-03 In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls “grit.” “Inspiration for non-geniuses everywhere” (People). The daughter of a scientist who frequently noted her lack of “genius,” Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she’s learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. “Duckworth’s ideas about the cultivation of tenacity have clearly changed some lives for the better” (The New York Times Book Review). Among *Grit*’s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).

The Spirit of Nursing The Spirit of Nursing Project. 2019-01-28 *The Spirit of Nursing* is filled with stories from more than 40 authors who have been inspired by their choice of career. Collectively, they boast 1,091 years of practice, diverse certifications, and numerous degrees. Some have just begun their practice and others have worked as nurses for half a century or more. Read how we have earned the true credentials needed to provide care for strangers, family members, and each other. Learn how we have earned the academic and honorary titles required to lead each other in our profession. The stories we have collected here cover the moment each contributor knew he or she was to become a nurse, what was learned (and what was not) in nursing school, and unforgettable patients and colleagues. But this book is about more than the sum of all of the parts that make up our nursing trajectories. It is about the process of becoming and being a nursing colleague. Filled with professionals who have earned their distinction as leaders in practice and healers in their communities, it is rumination on what it means to care. It is also a thank you to a line of work that has given us so much.

Intrepid Aviators Gregory G. Fletcher.2013-07-02 The true story of the World War II Pacific naval battle that pitted the USS Intrepid's naval aviators against Japan's superbattleship Musashi during the Battle of Leyte Gulf. October 24, 1944: As World War II raged, six young American bombers from Torpedo Squadron 18 were sent on a search-and-destroy mission in the Sibuyan Sea. Their target: the superbattleship Musashi, the pride of the Imperial Japanese Navy. The pilots were tasked with preventing the immense enemy warship from inflicting damage on American supply ships. Little did these men know that they had embarked on the opening round of history's greatest—and last—epic naval battle. Two bomber crews launched in the first wave of attackers were shot out of the sky. Only pilot Will Fletcher survived the crash landing. Adrift at sea, Will made his way to land and escaped into the jungles of the Philippines, where he eluded capture by the Japanese with the help of Filipino guerrillas, whose ranks he joined to fight against their common enemy. Intrepid Aviators is the thrilling true story of these brave bomber pilots, their daring duel with the Musashi, and Will Fletcher's struggle to survive as a guerrilla soldier. The sinking of Musashi inflicted a crucial blow in the Battle of Leyte Gulf and marked the first time in history that aviators sank a Japanese battleship on the high seas.

Rethinking Value-Added Models in Education Audrey Amrein-Beardsley.2014-04-24 Since passage of the of No Child Left Behind Act in 2001, academic researchers, econometricians, and statisticians have been exploring various analytical methods of documenting students' academic progress over time. Known as value-added models (VAMs), these methods are meant to measure the value a teacher or school adds to student learning from one year to the next. To date, however, there is very little evidence to support the trustworthiness of these models. What is becoming increasingly evident, yet often ignored mainly by policymakers, is that VAMs are 1) unreliable, 2) invalid, 3) nontransparent, 4) unfair, 5) fraught with measurement errors and 6) being inappropriately used to make consequential decisions regarding such things as teacher pay, retention, and termination. Unfortunately, their unintended consequences are not fully recognized at this point either. Given such, the timeliness of this well-researched and thoughtful book cannot be overstated. This book sheds important light on the debate surrounding VAMs and thereby offers states and practitioners a highly important resource from which they can move forward in more research-based ways.

Transforming Insitutions Gabriela C. Weaver, Wilella D. Burgess, Amy L. Childress, Linda Slakey. 2015-10-15 Higher education is coming under increasing scrutiny, both publically and within academia, with respect to its ability to appropriately prepare students for the careers that will make them competitive in the 21st-century workplace. At the same time, there is a growing awareness that many global issues will require creative and critical thinking deeply rooted in the technical STEM (science, technology, engineering, and mathematics) disciplines. However, the existing and ingrained structures of higher education, particularly in the STEM fields, are not set up to provide students with extensive skill development in communication, teamwork, and divergent thinking, which is needed for success in the knowledge economy. In 2011 and again in 2014, an international conference was convened to bring together university leaders, educational policymakers and researchers, and funding agency representatives to discuss the issue of institutional transformation in higher education, particularly in the STEM disciplines. Central to the issue of institutional transformation is the ability to provide new forms of instruction so that students can gain the variety of skills and depth of knowledge they will need. However, radically altering approaches to instruction sets in motion a domino effect that touches on learning space design, instructional technology, faculty training and reward structures, course scheduling, and funding models. In order for one piece to move, there must be coordinated movement in the others, all of which are part of an entrenched and interconnected system. Transforming Institutions brings together chapters from the scholars and leaders who were part of the 2011 and 2014 conferences. It provides an overview of the context and challenges in STEM higher education, contributed chapters describing programs and research in this area, and a reflection and summary of the lessons from the many authors' viewpoints, leading to suggested next steps in the path toward transformation.

Perspectives in Interactional Psychology Lawrence Pervin. 2013-11-11 An old woman walks slowly up the hill from the store to her house. The hill is quite steep and the packages she carries, heavy. The two ten-year-olds watching her feel sorry for her and, moving toward her, ask if they might help carry the packages. They easily lift them and with almost no effort bring the shopping bags to the top of the hill. After receiving all A's in his first term in college, F. finds that this term is much harder, especially his physics courses, in which he is failing. He has talked to his professor twice, but finds he cannot understand what she is teaching. Somehow, he thinks, if she could only present the material in a different way, I could understand it

better! A month ago, as B. lay playing quietly in his crib, a toy key slipped out of his hand onto the floor. Almost immediately he turned his attention to another toy, close by, which he took up and put into his mouth. Yesterday, very nearly the same thing happened, except this time as soon as the toy key fell, he began to cry loudly, forcing me to stop what I was doing and retrieve it for him. It seemed in the first case that he forgot it, while yesterday, even though it was gone, out of his sight, he still remembered it and wished it back.

Curriculum Leadership by Middle Leaders Kelvin Heng Kiat Tan,Mary Anne Heng,Christina Lim-Ratnam.2016-08-12 Curriculum Leadership by Middle Leaders focusses on major issues relating to the continuing national and international discourse on curriculum leadership, and highlights the vital role of middle leaders in schools. School leadership has focused primarily on first-order change involving school leaders or principals. This book seeks to put the spotlight on second-order change that involves curriculum leadership and professional development support on the part of middle leaders for more sustainable and long-term change in teaching and learning that will influence what happens in classrooms. With timely and thought-provoking contribution from authors who pursue a range of scholarly interests in multiple educational settings, the book is guided by several underlying questions: How might we re-envision curriculum leadership so that it addresses both local and global concerns and aspirations? How might we better grasp how middle leaders understand and respond to the pressures of educational reform initiatives? How might middle leaders transform pressures into possibilities? This book will appeal to current teachers, those currently undertaking teacher training and students or academics carrying out research in the field of educational leadership.
