A Psalm for the Wild-Built Becky Chambers.2021-07-13 Winner of the Hugo Award! In A Psalm for the Wild-Built, bestselling Becky Chambers's delightful new Monk and Robot series, gives us hope for the future. It's been centuries since the robots of Panga gained self-awareness and laid down their tools; centuries since they wandered, en masse, into the wilderness, never to be seen again; centuries since they faded into myth and urban legend. One day, the life of a tea monk is upended by the arrival of a robot, there to honor the old promise of checking in. The robot cannot go back until the question of what do people need? is answered. But the answer to that question depends on who you ask, and how. They're going to need to ask it a lot. Becky Chambers's new series asks: in a world where people have what they want, does having more matter? On Food and Cooking Harold McGee.2007-03-20 A kitchen classic for over 35 years, and hailed by Time magazine as a minor masterpiece when it first appeared in 1984, On Food and Cooking is the bible which food lovers and professional chefs worldwide turn to for an understanding of where our foods come from, what exactly they're made of, and how cooking transforms them into something new and delicious. For its twentieth anniversary, Harold McGee prepared a new, fully revised and updated edition of On Food and Cooking. He has rewritten the text almost completely, expanded it by two-thirds, and commissioned more than 100 new illustrations. As compulsively readable and engaging as ever, the new On Food and Cooking provides countless eye-opening insights into food, its preparation, and its enjoyment. On Food and Cooking pioneered the translation of technical food science into cook-friendly kitchen science and helped birth the inventive culinary movement known as molecular gastronomy. Though other books have been written about kitchen science, On Food and Cooking remains unmatched in the accuracy, clarity, and thoroughness of its explanations, and the intriguing way in which it blends science with the historical evolution of foods and cooking techniques. Among the major themes addressed throughout the new edition are: · Traditional and modern methods of food production and their influences on food quality · The great diversity of methods by which people in different places and times have prepared the same ingredients · Tips for selecting the best ingredients and preparing them successfully · The particular substances that give foods their flavors, and that give us pleasure · Our evolving knowledge of the health benefits and risks of foods On Food and Cooking is an invaluable and monumental compendium of basic information about ingredients, cooking methods, and the pleasures of eating. It

will delight and fascinate anyone who has ever cooked, savored, or wondered about food.

Warfare in a Fragile World Stockholm International Peace Research Institute,Arthur H. Westing.1980 Among the crucial problems that confront mankind today are those associated with a degraded environment. This book examines the extent to which warfare and other military activities contribute to such degradation. The military capability to damage the environment and to cause ecological disruption has escalated, and there is no sign that the level of conflict in the world is decreasing. The military use and abuse of each of the several major global habitats -- temperate, tropical, desert, arctic, insular, and oceanic -- are evaluated separately in the light of the civil use and abuse of that habitat--Dust jacket.

Ocean's Trial Demelza Carlton.2014-09-01 Smuggled ashore by the kind widow Merry D'Angelo, Maria begins her new life in the colonial port city of Fremantle. With the help of a young fisherman named Tony, she fights to find her place among a people so different to her own. Yet danger lurks beneath the surface of the turbulent harbour waters as her past races to catch up with her; threatening her future and her friends, and forcing her to choose between her old love and the new. A tiny taste of what's in store: Merry bowed her head. I understand. But what will you do? What work do you know? I know fish and I know the ocean. That is all, I said forlornly. For all my hopes, I already felt lost. Her world was still painfully new to me. I think I can help you find a job. A job for a girl who knows fish and the ocean. But you will need a name. Your father's, your husband's...as I am Meryl D'Angelo, you must have a last name, too. I can't tell you, I replied. I'd hoped... She laughed. Speranza. Hope in Italian. If you won't tell me your real name, you will be Maria Speranza, the young fisherman's widow who lives in hope. She shooed me toward the door. Go now and send the telegram. The sooner he hears you're alive, the sooner you'll be in his arms again. She squeezed past me, pulling on her gloves before donning a hat. I need to speak to some friends to see if they can help you. Merry hurried out the front door. I had a goal, a hope for the future. And a name to go with it. Maria Speranza, the widow who lived in hope. And for the first time, I did.

Maximum Harm Michele R. McPhee.2017-04-04 In Maximum Harm, veteran investigative journalist Michele R. McPhee unravels the complex story behind the public facts of the Boston Marathon bombing. She examines the bombers' roots in Dagestan and Chechnya, their struggle to assimilate in America, and their growing hatred of the United States - a deepening antagonism that would prompt federal prosecutors to dub Dzhokhar Tsarnaev America's worst nightmare. The difficulties faced by the Tsarnaev family of Cambridge, Massachusetts, are part of the public record. Circumstances less widely known are the FBI's recruitment of the older brother, Tamerlan Tsarnaev, as a mosque crawler to inform on radical separatists here and in Chechnya; the tracking down and killing of radical Islamic separatists during the six months he spent in Russia - travel that raised eyebrows, since he was on several terrorist watchlists; the FBI's botched deals and broken promises with regard to his immigration; and the disenchantment, rage, and growing radicalization of Tamerlan and Dzhokhar, along with their mother, sisters, and Tamerlan's wife, Katherine. Maximum Harm is also a compelling examination of the Tsarnaev brothers' movements in the days leading up to the Boston Marathon bombing on April 15, 2013, the subsequent investigation, the Tsarnaevs' murder of MIT police officer Sean Collier, the high-speed chase and shootout that killed Tamerlan, and the manhunt in which the authorities finally captured Dzhokhar, hiding in a Watertown backyard. McPhee untangles the many threads of circumstance, coincidence, collusion, motive, and opportunity that resulted in the deadliest attack on the

city of Boston to date.

How Modern Science Came Into the World H. F. Cohen.2010 Once upon a time 'The Scientific Revolution of the 17th century' was an innovative concept that inspired a stimulating narrative of how modern science came into the world. Half a century later, what we now know as 'the master narrative' serves rather as a strait-jacket - so often events and contexts just fail to fit in. No attempt has been made so far to replace the master narrative. H. Floris Cohen now comes up with precisely such a replacement. Key to his path-breaking analysis-cum-narrative is a vision of the Scientific Revolution as made up of six distinct yet narrowly interconnected, revolutionary transformations, each of some twenty-five to thirty years' duration. This vision enables him to explain how modern science could come about in Europe rather than in Greece, China, or the Islamic world. It also enables him to explain how half-way into the 17th century a vast crisis of legitimacy could arise and, in the end, be overcome.

Arctic Human Development Report Joan Nymand Larsen,Gail Fondahl.2015-02-18 The goals of the second volume of the AHDR - Arctic Human Development Report: Regional Processes and Global Linkages - are to provide an update to the first AHDR (2004) in terms of an assessment of the state of Arctic human development; to highlight the major trends and changes unfolding related to the various issues and thematic areas of human development in the Arctic over the past decade; and, based on this assessment, to identify policy relevant conclusions and key gaps in knowledge, new and emerging Arctic success stories. The production of AHDR-II on the tenth anniversary of the first AHDR makes it possible to move beyond the baseline assessment to make valuable comparisons and contrasts across a decade of persistent and rapid change in the North. It addresses critical issues and emerging challenges in Arctic living conditions, quality of life in the North, global change impacts and adaptation, and Indigenous livelihoods. The assessment contributes to our understanding of the interplay and consequences of physical and social change processes affecting Arctic residents' quality of life, at both the regional and global scales. It shows that the Arctic is not a homogenous region. Impacts of globalization and environmental change differ within and between regions, between Indigenous and non-Indigenous northerners, between genders and along other axes.

Next thing you'll tell me she was beautiful, too, and beckoning. His pitch crept impossibly high. Come to my cabin, Black, and I'll show you my melons.Black laughed. History of the Rise and Influence of the Spirit of Rationalism in Europe William Edward Hartpole Lecky.1919

Public Opinion Walter Lippmann.1922 In what is widely considered the most influential book ever written by Walter Lippmann, the late journalist and social critic provides a fundamental treatise on the nature of

human information and communication. The work is divided into eight parts, covering such varied issues as stereotypes, image making, and organized intelligence. The study begins with an analysis of the world outside and the pictures in our heads, a leitmotif that starts with issues of censorship and privacy, speed, words, and clarity, and ends with a careful survey of the modern newspaper. Lippmann's conclusions are as meaningful in a world of television and computers as in the earlier period when newspapers were dominant. Public Opinion is of enduring significance for communications scholars, historians, sociologists, and political scientists. Copyright © Libri GmbH. All rights reserved.

Property And Persuasion Carol M Rose.2019-09-05 With socialism largely discredited in recent years, the moral and legal status of private property has become an increasingly important area for discussion in contemporary political and social thought. Offering a contribution to legal theory, and to political and social philosophy, this work examines the two currently dominant traditions - those of neo-conservative utilitarianism and liberal communitarianism - emphasizing the strengths of both approaches and laying the groundwork for a theory to bridge the gap between them.

Then, on a March night, a storm rages near the coast of northeastern Massachusetts. Alex sits alone in an old farmhouse she inherited. The lights are out because of the storm; then, an unexpected knock at the door. When Alex opens it, her beautiful younger sister stands before her. Riley has long been estranged from their family, prompting Colleen to hire the private investigator from whom they'd been awaiting news. After her mysterious visitation, Alex and Colleen are determined to reconcile with Riley and to face their painful past.

The Spanish Lake Oskar Hermann Khristian Spate.2004-11-01 This work is a history of the Pacific, the ocean that became a theatre of power and conflict shaped by the politics of Europe and the economic background of Spanish America. There could only be a concept of the Pacific once the limits and lineaments of the ocean were set and this was undeniably the work of Europeans. Fifty years after the Conquista, Nueva Espaa and Peru were the bases from which the ocean was turned into virtually a Spanish lake.

The End of the World Maria Manuel Lisboa.2011 Our fear of the world ending, like our fear of the dark, is ancient, deep-seated and perennial. It crosses boundaries of space and time, recurs in all human communities and finds expression in every aspect of cultural production - from pre-historic cave paintings to high-tech computer games. This volume examines historical and imaginary scenarios of apocalypse, the depiction of its likely triggers, and imagined landscapes in the aftermath of global destruction. Its discussion moves effortlessly from classic novels including Aldous Huxley's *Brave New World*, George Orwell's *Nineteen Eighty-Four* and Margaret Atwood's *Oryx and Crake*, to blockbuster films such as *Blade Runner*, *Armageddon* and *Invasion of the Body Snatchers*. Lisboa also takes into account religious doctrine, scientific research and the visual arts to create a penetrating, multi-disciplinary study that provides profound insight into one of Western culture's most fascinating and enduring preoccupations.
