Guidelines for the management of symptomatic sexually transmitted infections World Health Organization.2021-07-15 The WHO global health sector strategy on sexually transmitted infections, 2016–2021, endorsed by the World Health Assembly in 2016, aims to eliminate STIs as a public health threat by 2030. In 2019, WHO published estimates of new cases of chlamydia, gonorrhoea, syphilis and trichomoniasis. Recent changes in the epidemiology of STIs and progress in prevention, diagnosis and treatment of STIs and HIV have necessitated changes in approaches to STI prevention and management. To address these STIs, the most widely used approach in clinical settings is the syndromic management of STIs. In most resource-limited settings, the syndromic management flow charts are still the standard of care where laboratory diagnosis is not available or is hard to access. The objectives of these guidelines are to provide updated, evidence-informed clinical and practical recommendations on the case management of people with symptoms of STIs; and to support countries in updating their national guidelines for the case management of people with symptoms of STIs. These guidelines include the management of symptomatic infections related to urethral discharge syndrome, including persistent urethral discharge syndrome; vaginal discharge syndrome, including persistent vaginal discharge; anorectal infection; genital ulcer disease syndrome; and lower abdominal pain syndrome. These guidelines are intended for programme managers for STI prevention and control at the national level and the health-care providers at the frontline – primary, secondary and tertiary health care.

African Rhino Richard Emslie.1999 The black and the white rhinoceros have become flagship species for international conservation. They are significant not only for the continuation of a major evolutionary heritage, but also as symbols for the protection of African savannahs. The battle for the survival of these species has been marked by some notable successes and sadly, many failures, and the situation is still critical. The international horn trade ban and the domestic bans imposed in most traditional user states have driven the trade further underground, in some cases inflating prices and making illegal dealing even more lucrative. This Plan is aimed at donors, government and non-government organizations, and all those involved in rhino conservation. It outlines the actions and strategies needed to catalyse support for these majestic animals, and help secure their future in sub-Saharan Africa. The overall conclusion is that, given the political will, stability and adequate field expenditure, rhinos can be conserved in the wild.

Diversity in Coastal Marine Sciences Charles W. Finkl, Christopher Makowski.2017-09-19 This book integrates a wide range of subjects into a coherent purview of the status of coastal marine science. Designed for the professional or specialist in coastal science, oceanography, and related disciplines, this work will appeal to workers in multidisciplinary fields that strive for practical solutions to environmental problems in coastal marine settings around the world. Examples are drawn from many different geographic areas, including the Black Sea region. Subject areas covered include aspects of coastal marine geology, physics, chemistry, biology, and history. These subject areas were selected because they form the basis for integrative investigation of salient environmental problems or perspective solutions or interpretation of historical context.

Tilapias: Biology and Exploitation M.C.M Beveridge, B. McAndrew.2012-12-06 Referred to in the Bible, pictured on the wall-friezes of ancient Egyptian tombs, and a subject of fascination for generations of scientists, the tilapias (Cichlidae: Tilapiini) have featured in the diet and culture of humankind for thousands of years. The present century has seen their spread from Africa throughout the tropics and sub-tropics, largely for food and fisheries purposes. This book attempts to pull together our knowledge of this important group - their biology and fisheries and aquaculture - in a single volume, something that has not been done comprehensively for nearly two decades. A succession of chapters by acknowledged authorities covers evolution, phylogenetic relationships and biogeography, reproductive biology, mating systems and parental care, diet, feeding and digestive physiology, environmental physiology and energetics, the role of tilapias in ecosystems, population dynamics and management, genetics, seed production, nutrition, farming, economics and marketing. The book is aimed at biologists, fisheries scientists, aquaculturists, and all interested in aquatic ecology.

Sexual Fluidity Lisa M. Diamond.2008 Is love “blind” when it comes to gender? For women, it just might be. This unsettling and original book offers a radical new understanding of the context-dependent nature of female sexuality. Lisa M. Diamond argues that for some women, love and desire are not rigidly heterosexual or homosexual but fluid, changing as women move through the stages of life, various social groups, and, most important, different love relationships. This perspective clashes with traditional views of sexual orientation as a stable and fixed trait. But that view is based on research conducted almost entirely on men. Diamond is the first to study a large group of women over time. She has tracked one hundred women for more than ten years as they have emerged from adolescence into adulthood. She summarizes their experiences and reviews research ranging from the psychology of love to the biology of sex differences. *Sexual Fluidity* offers moving first-person accounts of women falling in and out of love with men or women at different times in their lives. For some, gender becomes irrelevant: “I fall in love with the person, not the gender,” say some respondents. *Sexual Fluidity* offers a new understanding of women’s sexuality—and of the central importance of love.

Minerva's Message Martin S. Staum.1996-10-17 In theory the CMPS was set up to enshrine the human and social studies that were at the heart of Enlightenment culture. Staum illustrates, however, that the Institute helped transform key ideas of the Enlightenment in order to maintain civil rights while upholding social stability, and that the social and political assumptions on which it was based affected notions of social science. He traces the careers of individual members and the factions within the Institute, arguing that the discord within the CMPS reflects the unravelling of Enlightenment culture. *Minerva's Message* presents a valuable overview of the intellectual life of the period and brings together new evidence about the social sciences in their nascent period.

That all may live! Chitando, Ezra, Mombo, Esther, Gunda, Masiwa Ragies.2021-10-13 This volume of BiAS/ ERA is a Festschrift honouring Nyambura J. Njoroge. She is an outstanding woman theologian whose work straddles diverse fields and disciplines. Inspired by her rich and impressive oeuvre, in this volume friends and colleagues of her (among them celebrities like Musa Dube, Gerald West, Fulata Moyo, Ezra Chitando, and others) explore how religion and theology in diverse contexts can become more life giving. Contributors from many countries and different continents explore themes such as African women's leadership, theological education, HIV/ AIDS, lament, the Bible and liberation, adolescents and young women, sexual diversity and others. Collectively, the volume expresses Nyambura's consistent commitment to the full liberation of all human beings, in fulfilment of the gospel's promise that all may have life and have it to the full (John 10:10)

Women's Rights in the Middle East and North Africa Sanja Kelly, Julia Breslin.2010-07-16 Freedom House's innovative publication *Women's Rights in the Middle East and North Africa: Progress Amid Resistance* analyzes the status of women in the region, with a special focus on the gains and setbacks for women's rights since the first edition was released in 2005. The study presents a comparative evaluation of conditions for women in 17 countries and one territory: Algeria, Bahrain, Egypt, Iran, Iraq, Jordan, Kuwait, Lebanon, Libya, Morocco, Oman, Palestine (Palestinian Authority and Israeli-Occupied Territories), Qatar, Saudi Arabia, Syria, Tunisia, United Arab Emirates, and Yemen. The publication identifies the causes and consequences of gender inequality in the Middle East, and provides concrete recommendations for national and international policymakers and implementers. Freedom House is an independent nongovernmental organization that supports democratic change, monitors freedom, and advocates for democracy and human rights. The project has been embraced as a resource not only by international players like the United Nations and the World Bank, but also by regional women's rights organizations, individual activists, scholars, and governments worldwide. Women's rights in each country are assessed in five key areas: (1) Nondiscrimination and Access to Justice; (2) Autonomy, Security, and Freedom of the Person; (3) Economic Rights and Equal Opportunity; (4) Political Rights and Civic Voice; and (5) Social and Cultural Rights. The methodology is based on the Universal Declaration of Human Rights, and the study results are presented through a set of numerical scores and analytical narrative reports.

Destruction and human remains Jean-Marc Dreyfus,Élisabeth Anstett.2016-05-16 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Destruction and human remains investigates a crucial question frequently neglected in academic debate in the fields of mass violence and genocide studies: what is done to the bodies of the victims after they are killed? In the context of mass violence, death does not constitute the end of the executors' work. Their victims' remains are often treated and manipulated in very specific ways, amounting in some cases to true social engineering, often with remarkable ingenuity. To address these seldom-documented phenomena, this volume includes chapters based on extensive primary and archival research to explore why, how and by whom these acts have been committed through recent history. Interdisciplinary in scope, Destruction and human remains will appeal to readers interested in the history and implications of genocide and mass violence, including researchers in anthropology, sociology, history, politics and modern warfare. The research program leading to this publication has received funding from the European Research Council under the European Union's Seventh Framework Programme (FP/2007-2013) / ERC Grant Agreement n° 283-617.

Worlds of Work Daniel B. Cornfield,Randy Hodson.2012-12-06 The advent of transnational economic production and market integration compels sociologists of work to look beyond traditional national boundaries and build an international sociology of work in order to effectively address the human, scientific, and practical challenges posed by global economic transnationalism. The purpose of this volume is to promote transnational dialogue about the sociology of work and help build a truly international discipline in this field.

Synopsis of Biological Data on the Eel, Anguilla, Anguilla (Linnaeus, 1758) C. L. Deelder,Food and Agriculture Organization of the United Nations.1984 This synopsis compiles and reviews the scattered information on the identify, distribution, life history, populatons, exploitation, management and culture of the eel, *Anguilla anguilla* (Linnaeus, 1758), a species that has been harvested in Europe for many centuries.

Sexually Transmitted Infections Antonio Cristaudo,Massimo Giuliani.2020-05-30 This comprehensive, well-illustrated, and easily accessible book documents the latest research outcomes concerning sexually transmitted infections (STIs) and describes important advances in their prevention, diagnosis and treatment. The changes in the epidemiology and clinical aspects of STIs that have occurred over the past decade are fully explored, with special attention to core groups and patients with immunological disorders. The emerging challenges associated with particular sexually transmitted pathogens, including *C. trachomatis*, *N. gonorrhoeae*, HPV, and HIV, are identified and discussed. Readers will find detailed information on modern preventive strategies, new laboratory and diagnostic techniques, and a range of innovative treatments, including vaccines, continuous antiretroviral therapy, and new drugs against hepatitis viruses. Attention is also drawn to new directions in biomedical research that promise clinical benefits for the patients and communities. The combination of a detailed clinical and research approach, with emphasis on new knowledge and innovative aspects, ensures that the book will be of value to a wide readership comprising both clinicians and researchers.

Pest Control: Operations and Systems Analysis in Fruit Fly Management Marc Mangel,James R. Carey,Richard E. Plant.2013-06-29 These are the proceedings of an Advanced Research Workshop (ARW), sponsored by the NATO Science Panel, entitled Pest Control: Operations and Systems Analysis in Fruit Fly Management. The ARW was held in Bad Windsheim, Germany during the week of 5 August 1985. The purpose of the ARW was to bring together scientists who are interested in fruit fly problems, but who usually do not have an opportunity to speak with each other, for an intense week of interdisciplinary collaboration. In particular, the group present at the ARW contained a mix of biologists, field ecologists, mathematical modellers, operational program managers, economists and social scientists. Each group has its own professional meetings at which fruit fly problems are discussed, but the point of the ARW was to learn about the problem from the perspective of other fields, which are equally important for the ultimate management of the fruit fly problems. (A list of attendees follows this preface.) It appears that the ARW successfully met its objective of bringing together a group for interdisciplinary considerations of the problems; I hope that the proceedings do as well. The ARW was structured with formal lectures in the mornings and workshops in the afternoons. For the morning lectures, four different topics were chosen: 1) basic biology and ecology, 2) trapping and detection, 3) control and eradication, and 4) policy issues. Each morning, one lecture from each area was presented.

Aristotle's Animals in the Middle Ages and Renaissance Carlos G. Steel,Guy Guldentops,Pieter Beullens.1999 Aristotle's zoological writings with their wealth of detailed investigations on diverse species of animals have fascinated medieval and Renaissance culture. This volume explores how these texts have been read in various traditions (Arabic, Hebrew, Latin), and how they have been incorporated in different genres (in philosophical and scientific treatises, in florilegia and encyclopedias, in theological symbolism, in moral allegories, and in manuscript illustrations). This multidisciplinary and multilinguistic approach highlights substantial aspects of Aristotle's animals.

Women's Emancipation and Civil Society Organisations Schwabenland, Christina,Lange, Chris,Sachiko Nakagawa,Jenny Onyx.2016-10-05 Women are at the heart of civil society organizations (CSOs) that challenge oppressive practices at a local and global level and develop outstanding entrepreneurial activities. Yet CSO research tends to ignore considerations of gender, and the rich history of activist feminist organizations is rarely examined. This collection corrects that oversight, exploring the nexus between the emancipation of women and their roles in CSOs. Featuring contrasting, international studies from a wide range of contributors, it covers emerging issues such as the role of social media in organizing, the significance of religion in many cultural contexts, activism in Eastern Europe, and the impact of environmental degradation on women's lives. Asking whether involvement in CSOs offers a potential source of emancipation for women or maintains the status quo, this book will have an impact on both equal-opportunity policy and practice.

Women, Business and the Law 2021 World Bank.2021-04-05 Women, Business and the Law 2021 is the seventh in a series of annual studies measuring the laws and regulations that affect women's economic opportunity in 190 economies. The project presents eight indicators structured around women's interactions with the law as they move through their lives and careers: Mobility, Workplace, Pay, Marriage, Parenthood, Entrepreneurship, Assets, and Pension. This year's report updates all indicators as of October 1, 2020 and builds evidence of the links between legal gender equality and women's economic inclusion. By examining the economic decisions women make throughout their working lives, as well as the pace of reform over the past 50 years, Women, Business and the Law 2021 makes an important contribution to research and policy discussions about the state of women's economic empowerment. Prepared during a global pandemic that threatens progress toward gender equality, this edition also includes important findings on government responses to COVID-19 and pilot research related to childcare and women's access to justice.

Painted Love Hollis Clayson.2003-10-30 In this engrossing book, Hollis Clayson provides the first description and analysis of French artistic interest in women prostitutes, examining how the subject was treated in the art of the 1870s and 1880s by such avant-garde painters as Cézanne, Degas, Manet, and Renoir, as well as by the academic and low-brow painters who were their contemporaries. Clayson not only illuminates the imagery of prostitution-with its contradictory connotations of disgust and fascination-but also tackles the issues and problems relevant to women and men in a patriarchal society. She discusses the conspicuous sexual commerce during this era and the resulting public panic about the deterioration of social life and civilized mores. She describes the system that evolved out of regulating prostitutes and the subsequent rise of clandestine prostitutes who

escaped police regulation and who were condemned both for blurring social boundaries and for spreading sexual licentiousness among their moral and social superiors. Clayson argues that the subject of covert prostitution was especially attractive to vanguard painters because it exemplified the commercialization and the ambiguity of modern life.

Children and Violence E. Helander.2008-09-02 This book provides a disturbing account of the reality of child abuse. Based on data from 152 countries, Einar Helander considers the physical, societal, economic and judicial consequences of child abuse, proposing a universal, community-based prevention programme.

Pangolins .2019-11-23 Pangolins: Science, Society and Conservation brings together experts from around the world to document the most up-to-date scientific knowledge on pangolins and their conservation. It chronicles threats facing the species, explores the current initiatives required to protect them, and looks ahead at the future of pangolin science and conservation efforts. Led by a team of editors with more than 20 years collective experience in pangolin conservation, this book includes accounts of the species' evolution, morphology, and systematics. It discusses the role of pangolins in historically symbolic, mythological, and ritualistic practices across Africa, Asia, and Europe, as well as contemporary practices including international trafficking. Chapters in the latter portion of this book focus on conservation solutions, including law enforcement and international policy, behavior change, local community engagement, ex situ conservation, tourism, and other interventions needed to secure the future of the species. Pangolins: Science, Society and Conservation is the latest volume in Elsevier's species-specific series, Biodiversity of the World:

Conservation from Genes to Landscapes. This book is a valuable resource for researchers and students in species conservation science, planning, and policymaking. Provides detailed accounts of the natural history and conservation status of each pangolin species Explores the cultural significance of pangolins, historic and contemporary use, and international trade and trafficking Discusses conservation solutions ranging from law enforcement and local community engagement to ex situ conservation, innovative finance, and tourism

Sexed Pistols Vanessa Farr, Henri Myrtilinen, Albrecht Schnabel.2009 Every day, small arms and light weapons (SALW) kill, wound, and threaten millions of adults and children. Due to their widespread availability, mobility, and ease of use, prolific SALW have become central to maintaining social dislocation, destabilization, insecurity, and crime in the build-up to war, during wartime, and in the aftermath of conflict. Small arms are misused within domestic settings, as well as in public spaces, affecting everyone in the community without regard to sex or age. The impact of these weapons can be vastly different for women and men and for girls and boys. However, careful consideration of gender and age is rare in the formulation of small arms policy, of planning small arms collection or control, or even in small arms research. To counter the effects of prolific SALW, their role in gender- and age-specific violence must be more deeply analyzed and the results applied at the policy and operational level. This work should be undertaken in war-afflicted contexts, in societies suffering from elevated levels of social violence and / or severe underdevelopment, and in those tolerant of the presence of individually owned firearms. Contributors to the book draw on experience and research from around the world on the nexus of gender, age, violence, and small arms in developing and developed countries. They provide a number of recommendations for policies, programs, and research designed to further illuminate and counteract the firing of the sexed pistol.

Ecology of Tropical Oceans Gerard Meurant.2012-12-02 This book breaks new ground with the integration of geography, oceanography, plankton and benthic biology, as well as fish, to present a comprehensive account of the ecology of the tropical ocean. Proceeding from a description of the geomorphology, sediments, and vegetation of tropical continental shelves and the oceanography of tropical regions, the authors describe the benthos, plankton, and fish communities of tropical seas. An examination of the production of plant and animal life in tropical oceans is presented together with the numerical population biology of fish and invertebrates.

Descriptive Translation Studies and Beyond Gideon Toury.1995 A replacement of the author's well-known book on Translation Theory, In Search of a Theory of Translation (1980), this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a branch of the discipline, having immediate consequences for issues of both a theoretical and applied nature. Methodological discussions are complemented by an assortment of case studies of various scopes and levels, with emphasis on the need to contextualize whatever one sets out to focus on. Part One deals with the position of descriptive studies within TS and justifies the author's choice to devote a whole book to the subject. Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three. Concrete descriptive issues are here tackled within ever growing contexts of a higher level: texts and modes of translational behaviour □ in the appropriate cultural setup; textual components □ in texts, and through these texts, in cultural constellations. Part Four asks the question: What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice? This is an excellent book for higher-level translation courses.

The Constitution of Algorithms Florian Jatón.2021-04-27 A laboratory study that investigates how algorithms come into existence. Algorithms--often associated with the terms big data, machine learning, or artificial intelligence--underlie the technologies we use every day, and disputes over the consequences, actual or potential, of new algorithms arise regularly. In this book, Florian Jatón offers a new way to study computerized methods, providing an account of where algorithms come from and how they are constituted, investigating the practical activities by which algorithms are progressively assembled rather than what they may suggest or require once they are assembled.

Blue White Red Alain Mabanckou.2013-02-21 "Mabanckou dazzles with technical dexterity and emotional depth" in his debut novel, winner of the Grand Prix Littéraire de l'Afrique Noire (Publishers Weekly, starred review). This tale of wild adventure reveals the dashed hopes of Africans living between worlds. When Moki returns to his village from France wearing designer clothes and affecting all the manners of a Frenchman, Massala-Massala, who lives the life of a humble peanut farmer after giving up his studies, begins to dream of following in Moki's footsteps. Together, the two take wing for Paris, where Massala-Massala finds himself a part of an underworld of out-of-work undocumented immigrants. After a botched attempt to sell metro passes purchased with a stolen checkbook, he winds up in jail and is deported. Blue White Red is a novel of postcolonial Africa where young people born into poverty dream of making it big in the cities of their former colonial masters. Alain Mabanckou's searing commentary on the lives of Africans in France is cut with the parody of African villagers who boast of a son in the country of Digol. Praise for Alain Mabanckou and Blue White Red "Mabanckou counts as one of the most successful voices of young African literature." —Internationales Literaturfestival Berlin "The African Beckett." —The Economist "Blue White Red stands at the beginning of the author's remarkable and multifaceted career as a novelist, essayist and poet . . . this debut novel shows much of his style and substance in remarkable ways . . . Dundy's translation is excellent." —Africa Book Club "Mabanckou's provocative novel probes the many facets of the 'migration adventure.'" —Booklist

The Comparative Embryology of Sponges Alexander V. Ereskovsky.2010-03-27 One of the major questions in the evolution of animals is the transition from unicellular to multicellular organization, which resulted in the emergence of Metazoa through a hypothetical Urmethazoa. The Comparative Embryology of Sponges contains abundant original and literary data on comparative embryology and morphology of the Porifera (Sponges), a group of 'lower Metazoa'. On the basis of this material, original typization of the development of Sponges is given and the problems concerning origin and evolution of Porifera and their ontogenesis are discussed. A morphogenetic interpretation of the body plan development during embryogenesis, metamorphosis and asexual reproduction in Sponges is proposed. Special attention is given to the analysis of characteristic features of the ontogenesis in Porifera. The book pursues three primary goals: 1) generalization of all existing information on individual development of sponges, its classification and a statement according to taxonomical structure of Porifera; 2) revealing of heterogeneity of morphogenesis and peculiarities of ontogeneses in various clades of Porifera, and also their correlations with the organization, both adult sponges, and their larvae; 3) revealing homology of morphogeneses in both Porifera and Eumetazoa, testifying to the general evolutionary roots of multicellular animals, and peculiar features of sponges' morphogeneses and ontogenesis. This book will be of interest to embryologists, zoologists, morphologists and researchers in evolutionary biology.

Selected Practice Recommendations for Contraceptive Use World Health Organization. Reproductive Health and Research, World Health Organization, World Health Organization. Family and Community Health. 2005 This document is one of two evidence-based cornerstones of the World Health Organization's (WHO) new initiative to develop and implement evidence-based guidelines for family planning. The first cornerstone, the Medical eligibility criteria for contraceptive use (third edition) published in 2004, provides guidance for who can use contraceptive methods safely. This document, the Selected practice recommendations for contraceptive use (second edition), provides guidance for how to use contraceptive methods safely and effectively once they are deemed to be medically appropriate. The recommendations contained in this document are the product of a process that culminated in an expert Working Group meeting held at the World Health Organization, Geneva, 13-16 April 2004.

Primates Kurt Benirschke. 2012-12-06 This conference represents the first time in my life when I felt it was a misfortune, rather than a major cause of my happiness, that I do conservation work in New Guinea. Yes, it is true that New Guinea is a fascinating microcosm, it has fascinating birds and people, and it has large expanses of undisturbed rainforest. In the course of my work there, helping the Indonesian government and World Wildlife Fund set up a comprehensive national park system, I have been able to study animals in areas without any human population. But New Guinea has one serious drawback: it has no primates, except for humans. Thus, I come to this conference on primate conservation as an underprivileged and emotionally deprived observer, rather than as an involved participant. Nevertheless, it is easy for anyone to become interested in primate conservation. The public cares about primates. More specifically, to state things more realistically, many people care some of the time about some primates. Primates are rivaled only by birds, pandas, and the big cats in their public appeal. For some other groups of animals, the best we can say is that few people care about them, infrequently. For most groups of animals, no one cares about them, ever.

Knowledge, Science, and Literature in Early Modern Germany Gerhild Scholz Williams, Stephan K. Boy-Wives and Female Husbands Stephen O. Murray, Will Roscoe. 2021-04-01 Among the many myths created about Africa, the claim that homosexuality and gender diversity are absent or incidental is one of the oldest and most enduring. Historians, anthropologists, and many contemporary Africans alike have denied or overlooked African same-sex patterns or claimed that such patterns were introduced by Europeans or Arabs. In fact, same-sex love and nonbinary genders were and are widespread in Africa. *Boy-Wives and Female Husbands* documents the presence of this diversity in some fifty societies in every region of the continent south of the Sahara. Essays by scholars from a variety of disciplines explore institutionalized marriages between women, same-sex relations between men and boys in colonial work settings, mixed gender roles in east and west Africa, and the emergence of LGBTQ activism in South Africa, which became the first nation in the world to constitutionally ban discrimination based on sexual orientation. Also included are oral histories, folklore, and translations of early ethnographic reports by German and French observers. *Boy-Wives and Female Husbands* was the first serious study of same-sex sexuality and gender diversity in Africa, and this edition includes a new foreword by Marc Epprecht that underscores the significance of the book for a new generation of African scholars, as well as reflections on the book's genesis by the late Stephen O. Murray. This book is freely available in an open access edition thanks to the generous support of the Murray Hong Family Trust. Access the book online at the SUNY Open Access Repository at <http://hdl.handle.net/20.500.12648/1714>.

Penile Disorders Hartmut Porst. 2012-12-06 This book contains a compilation of papers based on presentations made at the International Symposium on Penile Disorders held in Hamburg, Germany, 26-27 January 1996, under the Chairmanship of Hartmut Porst. This was a unique conference in that it comprehensively addressed various disorders that affect the organ situated at the center of the male, the penis. As an important beginning, the sociocultural aspects of the erect phallus were presented by G. Wagner from Copenhagen. The anatomy of the penis and the physiological conditions of erection were then discussed by K.-P. J. Unemann from Mannheim, Germany. Previous conferences on the penis had concentrated only on specific areas of disease such as impotence. However, it became readily apparent that at this conference something new for almost every aspect of disease would be discussed, including congenital disorders such as hypospadias and epispadias, sexually transmitted and noninfectious dermatological diseases, and congenital and acquired penile curvatures and penile fractures. An excellent presentation of managing penile cancer by stage related therapeutic decision was presented by S. C. Müller from Bonn, Germany. There is no better person to present a discussion of Peyronie's disease in 1996 from a historical and management perspective than J. Pryor from London, UK. This same degree of expertise was also demonstrated by I. Saenz de Tejada from Madrid, Spain, regarding priapism.

Dictionary of Abbreviations in Medical Sciences Rolf Heister. 2012-12-06 Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.

Beta maritima Enrico Biancardi, Leonard W. Panella, Robert T. Lewellen. 2011-12-07 Along the undisturbed shores, especially of the Mediterranean Sea and the European North Atlantic Ocean, is a quite widespread plant called *Beta maritima* by botanists, or more commonly sea beet. Nothing, for the inexperienced observer's eye, distinguishes it from surrounding wild vegetation. Despite its inconspicuous and nearly invisible flowers, the plant has had and will have invaluable economic and scientific importance. Indeed, according to Linné, it is considered the progenitor of the beet crops possibly born from *Beta maritima* in some foreign country. Recent molecular research confirmed this lineage. Selection applied after domestication has created many cultivated types with different destinations. The wild plant always has been harvested and used both for food and as a medicinal herb. Sea beet crosses easily with the cultivated types. This facilitates the transmission of genetic traits lost during domestication, which selection processes aimed only at features immediately useful to farmers and consumers may have depleted. Indeed, as with several crop wild relatives, *Beta maritima* has been successfully used to improve cultivated beet's genetic resistances against many diseases and pests. In fact, sugar beet cultivation currently would be impossible in many countries without the recovery of traits preserved in the wild germplasm. Dr. Enrico Biancardi graduated from Bologna University. From 1977 until 2009, he was involved in sugar beet breeding activity by the Istituto Sperimentale per le Colture Industriali (ISCI) formerly Stazione Sperimentale di Bieticoltura (Rovigo, Italy), where he released rhizomania and cercospora resistant germplasm and collected seeds of Mediterranean sea beet populations as a genetic resource for breeding and ex situ conservation. Retired since 2009, he still collaborates with several working breeders, in particular, at the USDA Agricultural Research Stations, at the Chinese Academy of Agricultural Science (CAAS), and at the Athens University (AUA). He has edited books, book chapters and authored more than 150 papers. Dr. Lee Panella is a plant breeder and geneticist with the USDA-ARS at Fort Collins, Colorado. He earned his B.S. in Crop and Soil Science from Michigan State University, an M.S. in Plant Breeding from Texas A&M University, and a Ph.D. in genetics from the University of California at Davis. His research

focus is developing disease resistant germplasm using sugar beet wild relatives. He is chairman of the USDA-ARS Sugar Beet Crop Germplasm Committee and has collected and worked extensively with sea beet. Dr. Robert T. Lewellen was raised on a ranch in Eastern Oregon and obtained a B.S. in Crop Science from Oregon State University followed by a Ph.D. from Montana State University in Genetics. From 1966 to 2008 he was a research geneticist for the USDA-ARS at Salinas, California, where he studied the genetics of sugar beet and as a plant breeder, often used sea beet as a genetic source to produce many pest and disease resistant sugar beet germplasm and parental lines, while authoring more than 100 publications.

In the digital age, access to information has become easier than ever before. The ability to download Hot Za C Tudes En Sciences Sexuelles Manuel D App has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Hot Za C Tudes En Sciences Sexuelles Manuel D App has opened up a world of possibilities. Downloading Hot Za C Tudes En Sciences Sexuelles Manuel D App provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Hot Za C Tudes En Sciences Sexuelles Manuel D App has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Hot Za C Tudes En Sciences Sexuelles Manuel D App. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Hot Za C Tudes En Sciences Sexuelles Manuel D App. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Hot Za C Tudes En Sciences Sexuelles Manuel D App, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to

distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Hot Za C Tudes En Sciences Sexuelles Manuel D App has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

Bookstastik has free and discounted books on its website, and you can

follow their social media accounts for current updates. Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs. We also inform the library when a book is "out of print" and propose an antiquarian ... A team of qualified staff provide an efficient and personal customer service. It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' textbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator - a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser. Besides being able to read most types of ebook files, you can also use this app to get free Kindle books from the Amazon store. If you're looking for out-of-print books in different languages and formats, check out this non-profit digital library. The Internet Archive is a great go-to if you want access to historical and academic books. Because this site is dedicated to free books, there's none of the hassle you get with filtering out paid-for content on Amazon or Google Play Books. We also love the fact that all the site's genres are presented on the homepage, so you don't have to waste time trawling through menus. Unlike the bigger stores, Free-Ebooks.net also lets you sort results by publication date, popularity, or rating, helping you avoid the weaker titles that will inevitably find their way onto open publishing platforms (though a book has to be really quite poor to receive less than four stars). Free Kindle Books and Tips is another source for free Kindle books but discounted books are also mixed in every day. Looking for the next great book to sink your teeth into? Look no further. As the year rolls on, you may find yourself wanting to set aside time to catch up on reading. We have good news for you, digital bookworms — you can get in a good read without spending a dime. The internet is filled with free e-book resources so you can download new reads and old classics from the comfort of your iPad.
