The 160-Character Solution Benjamin L. Castleman. 2015-11-15 A fascinating study that brings the power of behavioral economics to how schools work, how students learn, and how we can help them succeed. For decades schools have invested substantial resources in boosting educational outcomes for disadvantaged students, but those investments have not always generated positive outcomes. Although many communities have expanded school choice, for example, families often choose to keep their children in failing schools. And while the federal government has increased the size of Pell Grants, many college-bound students who would be eligible for aid never apply. Then there is the troubling trend of "summer melt," in which up to 40 percent of high school graduates who have been accepted to college, mostly from underserved communities, fail to show up for the fall semester. In *The 160-Character Solution*, Benjamin L. Castleman shows how insights from behavioral economics—the study of how social, cognitive, and emotional factors affect our decisions—can be leveraged to help students complete assignments, perform to their full potential on tests, and choose schools and colleges where they are well positioned for success. By employing behavioral strategies or "nudges," Castleman shows, administrators, teachers, and parents can dramatically improve educational outcomes from preschool to college. Castleman applies the science of decision making to explain why inequalities persist at various stages in education and to identify innovative solutions to improve students' academic achievement and attainment. By focusing on behavioral changes, Castleman demonstrates that small changes in how we ask questions, design applications, and tailor reminders can have remarkable impacts on student and school success.

The Make-or-Break Year Emily Krone Phillips. 2019-01-08 A Washington Post Bestseller An entirely fresh approach to ending the high school dropout crisis is revealed in this groundbreaking chronicle of unprecedented transformation in a city notorious for its failing schools In eighth grade, Eric thought he was going places. But by his second semester of freshman year at Hancock High, his D's in Environmental Science and French, plus an F in Mr. Castillo's Honors Algebra class, might have suggested otherwise. Research shows that students with more than one semester F during their freshman year are very unlikely to graduate. If Eric had attended Hancock—or any number of Chicago's public high schools—just a decade earlier, chances are good he would have dropped out. Instead, Hancock's new way of responding to failing grades, missed homework, and other red flags made it possible for Eric to get back on track. *The Make-or-Break Year* is the largely untold story of how a simple idea—that reorganizing schools to get students through the treacherous transitions of freshman year greatly increases the odds of those students graduating—changed the course of two Chicago high schools, an entire school system, and thousands of lives. Marshaling groundbreaking research on the teenage brain, peer relationships, and academic performance, journalist turned communications expert Emily Krone Phillips details the emergence of Freshman OnTrack, a program-cum-movement that is translating knowledge into action—and revolutionizing how teachers grade, mete out discipline, and provide social, emotional, and academic support to their students. This vivid description of real change in a faulty system will captivate anyone who cares about improving our nation's schools; it will inspire educators and families to reimagine their relationships with students like Eric, and others whose stories

affirm the pivotal nature of ninth grade for all young people. In a moment of relentless focus on what doesn't work in education and the public sphere, Phillips's dramatic account examines what does.

Implementing Evidence-Based Prevention by Communities to Promote Cognitive, Affective, and Behavioral Health in Children National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Forum on Promoting Children's Cognitive, Affective, and Behavioral Health. 2017-06-14 Communities provide the context in which programs, principles, and policies are implemented. Their needs dictate the kinds of programs that community organizers and advocates, program developers and implementers, and researchers will bring to bear on a problem. Their characteristics help determine whether a program will succeed or fail. The detailed workings of programs cannot be separated from the communities in which they are embedded. Communities also represent the front line in addressing many behavioral health conditions experienced by children, adolescents, young adults, and their families. Given the importance of communities in shaping the health and well being of young people, the National Academies of Sciences, Engineering, and Medicine held a workshop in June 2016, to examine the implementation of evidence-based prevention by communities. Participants examined questions related to scaling up, managing, and sustaining science in communities. This publication summarizes the presentations and discussions from the workshop.

The Good School Peg Tyre. 2011-08-16 Award-winning education journalist Peg Tyre mines up-to-the-minute research to equip parents with the tools and knowledge necessary to get their children the best education possible We all know that the quality of education served up to our children in U.S. schools ranges from outstanding to shockingly inadequate. How can parents tell the difference? And how do they make sure their kids get what's best? Even the most involved and informed parents can feel overwhelmed and confused when making important decisions about their child's education. And the scary truth is that evaluating a school based on test scores and college admissions data is like selecting a car based on the color of its paint. Synthesizing cutting-edge research and firsthand reporting, Peg Tyre offers parents far smarter and more sophisticated ways to assess a classroom and decide if the school and the teacher have the right stuff. Passionate and persuasive, *The Good School* empowers parents to make sense of headlines; constructively engage teachers, administrators, and school boards; and figure out the best option for their child—be that a local public school, a magnet program, a charter school, homeschooling, parochial, or private.

Discipleship in Education Joseph Allotta. 2018-02-08 Students are often tested to evaluate their academic knowledge, but few Christian schools use objective measures to determine if a student has become a true disciple of Christ. Unfortunately, there are few organizations that provide metrics for measuring biblical knowledge, let alone any sort of comparative evaluation of students engaging in the Christian disciplines, forming a biblical worldview, or actually being impacted spiritually by the programs of the school. No matter whose statistics one chooses to believe, the inescapable truth is that the church is losing its young men and women at an alarming rate once they graduate from high school. The solution to this problem is simple, but increasingly difficult to solve with each passing year. Discipleship is what is needed for young people to truly identify who they are in Christ, so that they can begin to develop godly habits and ultimately grow in their knowledge, faith, and desire to serve the Lord and his Kingdom.

Christian schools have some particular advantages in the area of discipleship; however, their full potential is, at the moment, untapped. Discipleship in Education is about preparing everyone from administrators, teachers, pastors, and parents to be ready to unleash that potential.

On the Rocketship Richard Whitmire. 2014-05-15 The face of American education is evolving—and the roadmap is clear *On the Rocketship: How Top Charter Schools are Pushing the Envelope* examines the rise and expansion of leading charter school network *Rocketship*, revealing the secret sauce that makes a successful program. A strong narrative with a timely message, the book explores how *Rocketship* started and the difficulties encountered as it expands. Designing schools for children who have been failed by traditional schools is extremely challenging work. Setbacks are inevitable. Later in the book the narrative shifts to the national picture, exploring how high performing charter schools are changing the education landscape in cities such as Denver, Memphis, and Houston. The book emerges just as charter schools are running into stiff political opposition in New York City and elsewhere. Even in San Jose, *Rocketship's* home base, the pushback against charter schools is gaining speed. *On the Rocketship* becomes a valuable resource for explaining what's at stake in this battle. Lose these schools, in New York, San Jose and other cities, and low-income and minority students lose their best shot at a quality education. Written by a veteran journalist who followed *Rocketship* through a school year, the book explores some of the factors that make *Rocketship* and other charters successful, including the blended learning that was pioneered at charter schools, especially *Rocketship*. Many schools around the country are looking to *Rocketship* as a model for implementing blended learning. The interplay between charter schools and blended learning is setting a change in motion, and the American education system is ready to evolve. *On the Rocketship* details this phenomenon, providing insights for educators across the nation.

The Autoimmune Fix Tom O'Bryan. 2016-09-20 Do you have crud in the blood? Millions of people suffer from autoimmunity whether they know it or not. The root cause of most weight gain, brain and mood problems, and fatigue, autoimmunity can take years--or even decades--for symptoms and a clear diagnosis to arise. Through years of research, Dr. Tom O'Bryan has discovered that autoimmunity is actually a spectrum, and many people

experiencing general malaise are already on it. And while autoimmune diseases, such as Alzheimer's, Multiple Sclerosis, osteoporosis, diabetes, and lupus, have become the third leading cause of death behind heart disease and cancer, many people affected are left in the dark. The good news is that many autoimmune conditions can be reversed through a targeted protocol designed to heal the autoimmune system, 70 percent of which is located in the gut. The Autoimmune Fix includes two comprehensive 3-week plans: In the first 3 weeks, you'll follow a Paleo-inspired diet during which you cut out gluten, sweets, and dairy--the three primary culprits behind autoimmunity. Once the dietary changes have been addressed, The Autoimmune Fix focuses on the other causes of autoimmunity such as genetics, other dietary issues, and microbiome. The Autoimmune Fix provides a practical and much-needed guide to navigating these increasingly common conditions to help you feel better and develop a plan that works for you.
