**Chris Marker** Catherine Lupton.2005 A critical study of the work of film-maker and media artist Chris Marker.

Power from on High Max Turner.2015-04-10 Power from on High offers the first critical survey of scholarship on the subject of Luke's view of the Spirit, assessing the rival theories by means of three criteria: continuity with Luke's background, relationship to other aspects of Luke's theology, and Luke's place in the development of more general New Testament thinking about the Spirit. Turner provides fresh insight on specific Lukan concepts and favored terms (including such phrases as full of the Holy Spirit and baptize with the Holy Spirit) that have been of significance not merely for the discipline of New Testament studies but also for confessional theologies of major streams of Christianity today, and seeks to advance a more coherent understanding of the general shape of Luke's pneumatology than has hitherto been offered.

**Emotion** Dylan Evans.2019-09-26 Was love invented by European poets in the Middle Ages or is it part of human nature? Will winning the lottery really make you happy? Is it possible to build robots that have feelings? In this Very Short Introduction Dylan Evans explores these and many other intriguing questions in this guide to the latest thinking about the emotions. Drawing on a wide range of scientific research, from anthropology and psychology to neuroscience and artificial intelligence, Evans takes the reader on a fascinating journey into the human heart, discussing the evolution of emotions and their biological basis, the science of happiness, and the role that emotions play in memory and decision making. Greeted by critics as a pop science classic when it was first published in 2001, the book has now been thoroughly revised and updated to incorporate new developments in our understanding of emotions, including new sections addressing the neural basis of empathy and the emotional impact of films. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

**Poiesis** Humphrey Davy Findley Kitto.1966 Attacks the critical practice of interpreting ancient Greek literature in terms of modern ideas, using the works of Aeschylus, Sophocles, Pindar, Plato, Thucydides and Shakespeare as examples.

A collection of his most important writings, this book sets out Elias' thinking during the course of his long career, with a discussion of how his work relates to that of other sociologists.

**Sick Societies** David Stuckler, Karen Siegel.2011-10-20 Chronic diseases-heart disease, diabetes, lung disease, and common cancers-claim more than one out of every two lives worldwide. Within the next few decades their toll will rise, most greatly in developing countries. Yet this rapid growth of chronic diseases is not being met with a proportionate global response. Left unaddressed, they pose a major threat to social and economic development. This book is the first to synthesize the growing evidence-base surrounding chronic disease, comprehensively addressing the prevention and control of chronic diseases from epidemiologic, economic, prevention/management, and political economy perspectives. Sick Societies is written in five main parts. The first three chapters explore the causes and consequences of chronic diseases on a global level. Chapter four identifies different approaches to preventing and managing chronic diseases, while chapters five and six consider the power and politics in global health that have stymied an effective response to chronic disease. In chapter seven, the themes from the first three parts come into focus through a series of invited contributions from leading public health experts. The final chapter sets out a model of pragmatic and imaginative solidarity, wherein the struggles of the rich and poor to survive are united by a common cause and shared goals.

**Choosing the Better Part?** Barbara E. Reid.1996 This work is a commentary on the passages in the Gospel of Luke in which women figure as characters and in the sayings of Jesus. These include the women of vision and spirit in the Infancy Narratives, the Galilean women who encounter Jesus, and the women empowered to serve. The method makes use of historical-critical, narrative, and feminist-liberationist approaches. This commentary is intended as a resource for students of the New Testament, pastors, seminarians, preachers, retreat directors, and Bible study groups.

**The Sources of the Synoptic Gospels** Wilfred Lawrence Knox.1953

The Political Plays of Euripides Günther Zuntz.1955

Fetal Behaviour Jan G. Nijhuis.1992 This insight into fetal behaviour is of great importance for those working in the fields of fetal psychology and psychobiology: it is important that they appreciate that a fetus can be observed only within the context of its behaviour and behavioural states.

Greek Tragedy and the Modern World Leo Aylen.1964 Greek tragedy, and modern dramatists who have attempted to present aspects of the same attitude.

**Nihilism and Culture** Johan Goudsblom.1980

The Genesis of the Naval Profession Norbert Elias.2007 Drawn largely from unpublished manuscripts, this compilation illustrates Norbert Elias' theory that the emergence of the professional naval officer in Great Britain was related both to the necessities of naval warfare and to the structure of society on land. Specifically, the innovation of the rank of midshipman meant that the British were able to mitigate the impact of social barriers between officers and ratings and gradually merge the two hierarchies.

**Goethe and the Greeks** Humphry Trevelyan.1981-10-15 'The revolution that is going on in me is that which has taken place in every artist who has studied Nature long and diligently and now seeks the remains of the great spirit of antiquity; his soul wells up, he feels a transfiguration of himself from within, a feeling of freer life, higher existence, lightness and grace.' It is Mr Trevelyan's purpose, in this profoundly interesting book, to trace the course of this development in Goethe, to determine its extent, to test its sincerity. To this task he brings, not only a complete knowledge of Goethe's life and works and of classical literature, but also a fine critical sense which enables him to direct his detailed knowledge towards a philosophical conclusion.' So wrote Herbert Read in The Spectator in December 1941 on the first publication of Goethe and the Greeks. Trevelyan's account of Goethe's fascination with the Greeks, his striving to master their culture, his vision of Hellenic man, is judged not to have been supplanted by any later work in English. Professor Lloyd-Jones has written a substantial Foreword for this reissue of Trevelyan's book, giving his own assessment

of Goethe's search for Hellenism and its influence on his work.

**The Formation of Q** John S. Kloppenborg.1987-01-01 In this groundbreaking study, John Kloppenborg traces the literary evolution of Q as a document of primitive Christianity by considering it within the context of ancient literary genres. He argues that Q is composed of three compositional layers, or strata, each of which reflects certain stages of development in the Q community. The earliest formative layer reflects the influence of ancient sapiential sayings: the second layer suggests the influence of the prophetic literature of judgment and contains prophetic oracles and many Son-of-Man sayings. The third layer contains a temptation story, moving the document from a chriae collection in the direction of a biography.

**Justice of Zeus** Hugh Lloyd-Jones.1983-12-28 Six lectures centered on the Greek idea of divine justice.

**Proclamation from Prophecy and Pattern** Darrell L. Bock.1997-01-01 Luke is here presented as contributing to New Testament Christology through his treatment of Old Testament Christological texts. This redaction-critical study argues that Luke's use of the Old Testament is not so much a 'proof from prophecy' as a 'proclamation' that draws both upon prophecies and upon patterns. This proclamation as it is developed in Luke-Acts serves to turn the reader's attention from seeing Jesus as Messiah to seeing him eventually as Lord.

**We Philologists** Friedrich Wilhelm Nietzsche.2020-12-25 We Philologists Friedrich Wilhelm Nietzsche

**Hooked** Howard Brody.2007 For decades, medical professionals have betrayed the public's trust by accepting various benefits from the pharmaceutical industry. Both drug company representatives and doctors employ artful spin to portray this behavior positively to the public, and to themselves. In *Hooked*, Howard Brody argues that we can neither understand the problem, nor propose helpful solutions until we identify the many levels of activity connecting these purportedly noble industries. We can pass laws and enact regulations, but ultimately the medical profession must take responsibility for its own integrity. *Hooked* is a wake-up call for anyone expecting high quality, ethical medical care.

**Aischylos** Ulrich von Wilamowitz-Moellendorff.1914

**An Essay on Time** Norbert Elias.2007 In this profound book, Elias characteristically turns an ancient philosophical question - what is time? - into a researchable theoretical-empirical problem. What we call 'time' is neither an innate property of the human mind nor an immutable quality of the 'external' world. Rather it is an achievement of the human capacity for 'synthesis', for using symbolic thought to make connections between two or more sequences of events. In the course of human social development, that capacity has itself changed and developed. It is originally written in English. Two later additional sections have been translated by Edmund Jephcott.

**From Mycenae to Homer** T. B. L. Webster.2014-06-11 This book, first published in 1958, aims to describe Greek art and poetry within this ambiguous period of ancient history (often referred to as the Greek 'Dark Ages'), and to explore the possibilities of learning about Mycenaean civilisation from its own documents and not only from archaeology. Specifically, Webster utilises Michael Ventris' decipherment of Linear B in 1952 - which proved that Greek was spoken in the Mycenaean world - to determine the general contours of aesthetic development from Mycenae to the time of the written composition of the Homeric epics. Because they record Mycenaean civilisation in Mycenaean terminology, while Homer was writing in Ionian Greek at the beginning of the polis civilisation, they show how much in Homer is in fact Mycenaean. Further, where it is clear that these Mycenaean elements cannot have survived until Homer's time, they tell us something about the poetry which connected the two.

**The Bibliomaniac** Charles Nodier.1894

**History of Structuralism** Francois Dosse.1997

**Introduction to the Work of Marcel Mauss** Claude Levi-Strauss.2013-08-21 First published in 1987. Claude Levi-Strauss is one of the intellectual giants of the twentieth century, a leading exponent of structuralism and a great social anthropologist. His *Introduction to the Work of Marcel Mauss*, originally written to preface the earliest major collection of Mauss's writings, *Sociologie et Anthropologie* (1950), was hailed as a seminal text by leading structuralists such as Derrida, Lacan and Barthes. This edition, the first English translation to be published, should prove invaluable to anthropologists, philologists, psychologists, and all those interested in one of the most important intellectual movements generated by the twentieth century. Levi-Strauss uses an approach combining anthropology and structural linguistics to assess Marcel Mauss's achievements and intentions arguing that Mauss - who at the time represented the mainstream of French anthropology - was in fact structuralist manque. He goes on to formulate the central tenets of structuralist thought: the belief in societies being organised on immutable and unconscious laws, this foundation then providing the basis for true scientific study; multi-disciplinary methodology combining anthropology, linguistics and psychoanalysis; and a faith that a comprehensive science of communication can be made by the application of mathematical reasoning.

**Prescribing by Numbers** Jeremy A. Greene.2007-02-15 Physician-historian Jeremy A. Greene examines the mechanisms by which drugs and chronic disease categories define one another within medical research, clinical practice, and pharmaceutical marketing, and he explores how this interaction has profoundly altered the experience, politics, ethics, and economy of health in late-twentieth-century America.

**The Jews in Luke-Acts** Jack T. Sanders.1987

**Dire les maux** Rémi Bordes.2011-06-01 Entre l'étude des rites et la pragmatique du discours, l'analyse des textes et celle des contextes, cet ouvrage montre les multiples motifs selon lesquels diverses cultures médicales font participer la parole au soin. S'éloignant de l'approche psychologique souvent proposée pour envisager la dimension thérapeutique du langage, il convoque non seulement l'ethnographie, mais aussi la psychanalyse, l'histoire et la philosophie.
