*Differences at Work: Practicing Critical Diversity Literacy* Melissa Steyn,Scott Burnett,Nceba Ndzwayiba.2021-04-21 This handbook provides practical tools and concepts forged from international best practice, and sharpened in the context of post-apartheid South Africa, that can be used to build critical diversity literate organizations. Organizations the world over - from nonprofits to large corporations, and secondary schools to massive intergovernmental institutions - increasingly tip into crisis as they fail to meet the challenges of diverse and complex societies. Their durability is tested by how they deal with difference, and whether they break out of dominant ways of thinking about culture, merit, and success. This book is thus designed to contribute to the ongoing conversation between the strategic imperatives of organizational leaders, and the day-management of diversity

interventions by diversity practitioners and human resources specialists. The authors present the CDL model in an easily understandable and practically implementable format that is grounded as much in rigorous academic research as it is in thousands of hours of industry experience. Six prominent, active critical diversity literacy practitioners offer concrete advice and insights into addressing racism, sexism, homophobia, ableism, and other oppressive dynamics. The text offers guidance on: · Analyzing what has changed in the local and global environment of the contemporary organization, and how to 'read' these challenges; · Identifying the warning signs of crisis, and addressing issues before they arise by building a responsive and flexible style of leadership; · Using the Critical Diversity Literacy framework to secure organizational alignment; · Theorizing how change happens within organizations; · Meeting and overcoming resistance from entrenched power interests; · Designing training and organizational development interventions.

**Stuart Hall** Kuan-Hsing Chen,David Morley.2006-05-23 Stuart Hall's work has been central to the formation and development of cultural studies as an international discipline. Stuart Hall: Critical Dialogues in Cultural Studies is an invaluable collection of writings by and about Stuart Hall. The book provides a representative selection of Hall's enormously influential writings on cultural studies and its concerns: the relationship with Marxism; postmodernism and 'New Times' in cultural and political thought; the development of cultural studies as an international and postcolonial phenomenon, and Hall's engagement with urgent and abiding questions of 'race', ethnicity and identity. In addition to presenting classic writings by Hall and new interviews with Hall in dialogue with Kuan-Hsing Chen, the collection, which includes work by Angela McRobbie, Kobena Mercer, John Fiske, Charlotte Brunsdon, Ien Ang and Isaac Julien, provides a detailed analysis of Hall's work and his contribution to

the development of cultural studies by leading cultural critics and cultural practitioners. The book also includes a comprehensive bibliography of Stuart Hall's writings.

**Neolithic Childhood** Anselm Franke, Tom Holert. 2018 Neolithic Childhood examines how in the interwar years the artistic avant-gardes in Europe and beyond reacted to the crisis of almost everything, from the barbarism of technological mass war to the hypocrisies of colonial discourse. The perceived need to re-establish European civilization after the disaster of the First World War led to an interminable reconstruction of origins and beginnings - making ground zero the limiting function of modernity. Based on the writings of the anti-academic art historian Carl Einstein (1885-1940), the exhibition is devoted to despair over the present and the pressing interest in altering humanity, as manifested from the 1920s to the 1940s in the artistic avant-gardes and the sciences. Exhibition: Haus der Kulturen der Welt, Berlin, Germany (13.04.-09.07.2018).

**The Combahee River Raid** Jeff W. Grigg.2014-10-28 The little-known story of the South Carolina military raid—led by a Union

colonel aided by Harriet Tubman—that freed hundreds of slaves. In 1863, the Union was unable to adequately fill its black regiments. In an attempt to remedy that, Col. James Montgomery led a raid up the Combahee River on June 2 to gather recruits and punish the plantations. Aiding him was an expert at freeing slaves—famed abolitionist Harriet Tubman. The remarkable effort successfully rescued about 750 enslaved men, women, and children. Only one soldier was killed in the action, which marked a strategy shift in the war that took the fight to civilians. This book details the fascinating true story that became a legend.

**Relocating Cultural Studies** Valda Blundell, John Shepherd, Ian Taylor. 2013-04-15 Britain is no longer the sole organizing centre for cultural studies. The contributors to this volume demonstrate how cultural studies has diffused into other English-speaking countries and how its original concerns have been renegotiated and changed. The result is a landmark book which provides students with an unrivalled guide to the international phenomenon of cultural studies.

Power and Structure in Theater Thomas Schmidt. 2023-12-04 Structure and power are two defining and interrelated aspects of the German theater business. It is based on the strictly hierarchical organization of 1900 and has undergone hardly any structural changes since then. This not only impairs the innovative capacity of this important institution, but also leads to inappropriately strong power positions of the directors, to conflicts with the ensembles and employees, and hinders the development and renewal of the artistic potentials of this cultural technique. The publication is based on the results of the study 'Art and Power in the Theater' - with 1966 participants the largest study of its kind. The content Power as a decision-making and management tool in the theater The connection between power and organization Power and abuse in the theater Structural power and forms of power containment Results of the study The target groups Students, teachers and researchers in the fields of

cultural management, cultural and theater studies, dramaturgy, psychology, sociology and anthropology, employees of management at the theater and other cultural organization The author Thomas Schmidt has been professor and director of the Theater and Orchestra Management program in Frankfurt since 2010. He was managing director of the National Theater Weimar from 2003 to 2013 and visiting professor at Harvard University in 2014.

**Vernacular Modernism** Maiken Umbach, Bernd-Rüdiger Hüppauf. 2005 Vernacular Modernism advocates a rethinking of the importance of the vernacular as part of the modernist discourse of place, from art to literature, from architectural to social practice.

*Profane Culture* Paul E Willis. 2014-08-24 A classic of British cultural studies, *Profane Culture* takes the reader into the worlds of two important 1960s youth cultures—the motor-bike boys and the hippies. The motor-bike boys were working-class motorcyclists who listened to the early rock 'n' roll of the late 1950s. In contrast, the hippies were middle-class drug users with long hair and a love of progressive music. Both groups were involved in an unequal but heroic fight to produce meaning and their own cultural forms in the face of a larger society dominated by the capitalist media and commercialism. They were pioneers of cultural experimentation, the self-construction of identity, and the curating of the self, which, in different ways, have become so widespread today. In *Profane Culture*, Paul Willis develops an important and still very contemporary theory and methodology for understanding the constructions of lived and popular culture. His new preface discusses the ties between the cultural moment explored in the book and today.

**Island Rivers** John R. Wagner, Jerry K. Jacka. 2018-06-19

Anthropologists have written a great deal about the coastal adaptations and seafaring traditions of Pacific Islanders, but have had much less to say about the significance of rivers for Pacific island culture, livelihood and identity. The authors of this collection seek to fill that gap in the ethnographic record by drawing attention to the deep historical attachments of island communities to rivers, and the ways in which those attachments are changing in response to various forms of economic development and social change. In addition to making a unique contribution to Pacific island ethnography, the authors of this volume speak to a global set of issues of immense importance to a world in which water scarcity, conflict, pollution and the degradation of riparian environments afflict growing numbers of people. Several authors take a political ecology approach to their topic, but the emphasis here is less on hydro-politics than on the cultural meaning of rivers to the communities we describe. How has the cultural significance of rivers shifted as a result of colonisation, development and nation-building? How do people whose identities are fundamentally rooted in their relationship to a particular river renegotiate that relationship when the river is dammed to generate hydro-power or polluted by mining activities? How do blockages in the flow of rivers and underground springs interrupt the intergenerational transmission of local ecological knowledge and hence the ability of local communities to construct collective identities rooted in a sense of place?

Fashioning Vienna Janet Stewart. 2013-06-17 This book seeks, through an examination of the form and content of his texts, to extend our understanding of Adolf Loos and his role in the struggle to define the nature of modernity in Vienna at the turn of the nineteenth century. It makes extensive use of primary sources including archive material and newspaper reports, which serve to

shed new light on the way in which Loos's writings are embedded in their socio-cultural context. Drawing on insights from German and Austrian studies, sociology and cultural history, this book offers a genuinely interdisciplinary approach to a figure who himself operated in an interdisciplinary fashion.

**Surveillance and Democracy** Kevin D. Haggerty, Minas Samatas. 2010-07-12 This collection represents the first sustained attempt to grapple with the complex and often paradoxical relationships between surveillance and democracy. Is surveillance a barrier to democratic processes, or might it be a necessary component of democracy? How has the legacy of post 9/11 surveillance developments shaped democratic processes? As surveillance measures are increasingly justified in terms of national security, is there the prospect that a shadow security state will emerge? How might new surveillance measures alter the conceptions of citizens and citizenship which are at the heart of democracy? How might new communication and surveillance systems extend (or limit) the prospects for meaningful public activism? Surveillance has become central to human organizational and epistemological endeavours and is a cornerstone of governmental practices in assorted institutional realms. This social transformation towards expanded, intensified and integrated surveillance has produced many consequences. It has also given rise to an increased anxiety about the implications of surveillance for democratic processes; thus raising a series of questions - about what surveillance means, and might mean, for civil liberties, political processes, public discourse, state coercion and public consent - that the leading surveillance scholars gathered here address.

Politics and Ambiguity William E. Connolly. 1987 In a series of stimulating essays, William E. Connolly explores the element of ambiguity in politics. He argues that democratic politics in a modern society requires, if it is to flourish, an appreciation of the ambiguous character of the standards and principles we cherish

the most. Connolly's work, lucidly, presented and intellectually challenging, will be of interest to students and scholars of political science, philosophy, rhetoric, and law, and to all whose interests include the connections between contemporary epistemological arguments and politics and, more broadly, between thought and language. Connolly criticizes the ways in which contemporary politics extends normalization into various areas of modern existence. He argues, against this trend, for an approach that would provide relief from the rigid identity formations that result from normalization. In supporting his thesis, Connolly shows how the imperative for growth must be relaxed if normalizing pressures are to be obviated. His, however, is not the familiar antigrowth argument; rather, he ties his thesis to his general antinormalization argument, asking how one could create an ethic that would sustain itself when the growth imperatives are relaxed. Connolly's chapters on the work of other thinkers (including Michel Foucault, Jürgen Habermas, Richard Rorty, and Charles Taylor) are linked with his main theme, as he shows how various tendencies in the philosophy of the social sciences and in political theory aid and abet the normalizing tendency. His analyses of Rorty and Taylor are especially important. Connolly shows the significance of antifoundationalism (Rorty's contribution to the debate on epistemology), while providing a compelling critique both of Rorty's stance and Taylor's alternative to it. Especially important to Connolly's thesis is the ontology on which it rests. He shows how the endorsement of an ontology of discordance within concord--a view that all systems of meaning impose order on that which was not designed to fit neatly within them--can support a more democratizing process. His final chapter, *Where the Word Breaks Off*, vindicates the ontology of discordance, which has governed the argument throughout the text. Throughout these essays, Connolly builds a consistent argument for the politicalization of normalization, disclosing forms of normalization where others have seen

unproblematic modes of communication and problem solving. Original in concept and bold in presentation, Connolly's work will form the basis for considerable debate in the several disciplines it serves.

**Understanding Privacy** Daniel J. Solove. 2010-03-30 Privacy is one of the most important concepts of our time, yet it is also one of the most elusive. As rapidly changing technology makes information increasingly available, scholars, activists, and policymakers have struggled to define privacy, with many conceding that the task is virtually impossible. In this concise and lucid book, Daniel J. Solove offers a comprehensive overview of the difficulties involved in discussions of privacy and ultimately provides a provocative resolution. He argues that no single definition can be workable, but rather that there are multiple forms of privacy, related to one another by family resemblances. His theory bridges cultural differences and addresses historical changes in views on privacy. Drawing on a broad array of interdisciplinary sources, Solove sets forth a framework for understanding privacy that provides clear, practical guidance for engaging with relevant issues. *Understanding Privacy* will be an essential introduction to long-standing debates and an invaluable resource for crafting laws and policies about surveillance, data mining, identity theft, state involvement in reproductive and marital decisions, and other pressing contemporary matters concerning privacy.

**The Politics of Modernism** Raymond Williams, Tony Pinkney. 1996 This is an exploration of the ambivalent relationship between revolutionary politics and modernist or avant-garde art. Williams clarifies many of the issues that have dogged recent critical discussion: the term modernism itself; the distinction between modernism and avant garde; and the possibility of a cultural theory beyond the modern which avoids the pitfalls of postmodernism.

**Navigational Surgery of the Facial Skeleton** Alexander

Schramm, Nils-Claudius Gellrich, Rainer Schmelzeisen. 2007-01-17 Computer-assisted techniques in the surgery of the facial skeleton including the skull base are depicted for the very first time in this atlas of navigational surgery. Experienced surgeons as well as trainees will benefit from the detailed and well-illustrated information on the use of computer technology in clinical routine, accompanied by the experimental basis of intraoperative accuracy. New methods of non-invasive referencing and the use of virtual models in the field of oral and cranio-maxillofacial surgery are demonstrated. Clinical cases illustrate the practical use of this new technique.

**Competing Visions** Ákos Moravánszky. 1998-01 This is a comparative study of the architecture of the countries that defined the Austro-Hungarian monarchy from 1867 to 1918. Although scholars have recognized the contributions of Viennese intellectuals, they have all but ignored those of other centres such as Budapest,

**History Matters** Judith M. Bennett. 2010-11-24 Written for everyone interested in women's and gender history, History Matters reaffirms the importance to feminist theory and activism of long-term historical perspectives. Judith M. Bennett, who has been commenting on developments in women's and gender history since the 1980s, argues that the achievement of a more feminist future relies on a rich, plausible, and well-informed knowledge of the past, and she asks her readers to consider what sorts of feminist history can best advance the struggles of the twenty-first century. Bennett takes as her central problem the growing chasm between feminism and history. Closely allied in the 1970s, each has now moved away from the other. Seeking to narrow this gap, Bennett proposes that feminist historians turn their attention to the intellectual challenges posed by the persistence of patriarchy. She posits a patriarchal equilibrium whereby, despite many changes in women's experiences over past centuries, women's status vis-à-vis that of men has remained

remarkably unchanged. Although, for example, women today find employment in occupations unimaginable to medieval women, medieval and modern women have both encountered the same wage gap, earning on average only three-fourths of the wages earned by men. Bennett argues that the theoretical challenge posed by this patriarchal equilibrium will be best met by long-term historical perspectives that reach back well before the modern era. In chapters focused on women's work and lesbian sexuality, Bennett demonstrates the contemporary relevance of the distant past to feminist theory and politics. She concludes with a chapter that adds a new twist—the challenges of textbooks and classrooms—to viewing women's history from a distance and with feminist intent. A new manifesto, *History Matters* engages forthrightly with the challenges faced by feminist historians today. It argues for the radical potential of a history that is focused on feminist issues, aware of the distant past, attentive to continuities over time, and alert to the workings of patriarchal power.

**Popular Culture and Everyday Life** Professor Toby Miller, Toby Miller Alec McHoul, Dr Alec W McHoul, Trish Miller, Tricia Miller. 1998-09-10 This broad-ranging survey of social and cultural theory issues an audacious challenge to contemporary cultural studies' emphasis on speculation, rather than observation. Toby Miller and Alec McHoul invite the reader to question their participation in both dominant and subcultural practices by providing perspectives on the everyday through ethnography, textual reading, discourse analysis and political economy. Following a summary of key ideas on an everyday practice, such as eating' or talking', each chapter considers the discourses that construct these practices, and concludes with one or more empirical investigations, opening up the possibility of a significant departure in cultural studies. The book ends with an excellent glossary of cultural studies terms.

*Powering to Peace* Veronique Dudouet. 2017-04-24 This report

explores the complementary ideas and practices that civil resistance and peacebuilding approaches present, each from different points along the conflict transformation spectrum. Both strategies oppose violence in all its forms, and seek to pursue just peace by peaceful means. However, they take different approaches to conflict transformation, both in their analyses of the primary causes of violence and how they respond to conflict. The report then describes how civil resistance and peacebuilding can work in tandem throughout the four stages of transformation of asymmetric conflicts. Concrete examples are provided to illustrate the respective functions of constructive conflict (through civil resistance) and conflict mitigation (through peacebuilding) in transitions from latent to overt conflict, from resistance to dialogue and negotiation, and from conflict settlement to sustainable peace. It highlights in particular: the crucial importance of civil resistance as a violence prevention/mitigation instrument and as a pre-negotiation strategy for oppressed groups, enabling them to wage necessary conflicts through nonviolent means, thereby putting pressure on incumbent elites to redistribute power equitably; the usefulness of peacebuilding's conflict mitigation methods to translate civil resistance gains into mutually acceptable negotiated outcomes and to reconcile polarized relationships in the wake of nonviolent struggles; and the need for sustained civil resistance in post-conflict or post-war societies in order to prevent and oppose autocratic backlashes, to resist anti-emancipatory, and 'neoliberal' tendencies within post-war peacebuilding operations, or to put pressure on all stakeholders to implement their commitments to progressive state reforms and social justice. The conclusion highlights takeaways for researchers, nonviolent activists and educators, peacebuilding practitioners and international agencies seeking to support constructive, effective conflict transformation.

*The End of Progress* Amy Allen.2016-01-12 While post- and

decolonial theorists have thoroughly debunked the idea of historical progress as a Eurocentric, imperialist, and neocolonialist fallacy, many of the most prominent contemporary thinkers associated with the Frankfurt School—Jürgen Habermas, Axel Honneth, and Rainer Forst—have defended ideas of progress, development, and modernity and have even made such ideas central to their normative claims. Can the Frankfurt School's goal of radical social change survive this critique? And what would a decolonized critical theory look like? Amy Allen fractures critical theory from within by dispensing with its progressive reading of history while retaining its notion of progress as a political imperative, so eloquently defended by Adorno. Critical theory, according to Allen, is the best resource we have for achieving emancipatory social goals. In reimagining a decolonized critical theory after the end of progress, she rescues it from oblivion and gives it a future.

*Individualizing Gender and Sexuality* Nancy J.

Chodorow.2012-05-04 Nancy Chodorow, in her groundbreaking book *The Reproduction of Mothering*, quite simply changed the conversation in at least three areas of study: psychoanalysis, women's studies, and sociology. In her latest book, *Individualizing Gender and Sexuality*, she examines the complexity and uniqueness of each person's personal creation of sexuality and gender and the ways that these interrelate with other aspects of psychic and cultural life. She brings her well-known theoretical agility, wide-ranging interdisciplinarity, and clinical experience to every chapter, advocating for the clinician's openness, curiosity, and theoretical pluralism. The book begins with reflections on Freud's *Three Essays on the Theory of Sexuality*, followed by considerations of Melanie Klein and Stephen Mitchell, as well as on her own work and on the postmodern turn in psychoanalytic gender theory. Subsequent chapters address contemporary clinical-cultural issues such as women and work, women and motherhood, and men and violence. Concluding chapters

elaborate on the multiple ingredients and the personal affective, conflictual, and defensive constellations and processes that create sexuality and gender in each individual. Ending with a chapter on homosexualities as compromise formations, Chodorow deepens her account of clinical individuality and sex-gender transference-countertransference while bringing her readers back to Freud and to the many strands that followed, as she consolidates a consistent line of interest in sexuality and gender, theory and practice, sustained over a lifetime.

**Open Codes** Blanca Giménez. 2022 Today we live in a globalized world, controlled and created by digital codes. From communication to transportation (of people, goods, and messages), everything is guided by codes that use electromagnetic waves and computers. With the *Open Codes. Living in Digital Worlds*± exhibition, the ZKM Karlsruhe is once again addressing the subject of digitalization and the recording of the world through the binary code. Everyone should have the chance to understand what lies behind today's digital world. The exhibition will present artworks and scientific works based on digital as well as on analog codes. The works visualize and explain the complex dynamics of code, and the way in which they are increasingly shaping the way we live and perceive the world. Exhibition: ZKM - Zentrum für Kunst und Medien, Karlsruhe, Germany (19.10.2017 - 06.01.2019).

**Screening the Body** Lisa Cartwright. 1995 Moving images are used as diagnostic tools and locational devices every day in hospitals, clinics and laboratories. But how and when did such issues come to be established and accepted sources of knowledge about the body in medical culture? How are the specialized techniques and codes of these imaging techniques determined, and whose bodies are studied, diagnosed and treated with the help of optical recording devices? *Screening the Body* traces the unusual history of scientific film during the late 19th and early 20th centuries, presenting material that is at once disturbing and

engrossing. Lisa Cartwright looks at films like *The Elephant* *Electrocution*. She brings to light eccentric figures in the history of the science film such as William P. Spratling who used Biograph equipment and crews to film epileptic seizures, and Thomas Edison's lab assistants who performed x-ray experiments on their own bodies. Drawing on feminist film theory, cultural studies, the history of film, and the writings of Foucault, Lisa Cartwright illustrates how this scientific cinema was a part of a broader tendency in society toward the technological surveillance, management, and physical transformation of the individual body and the social body. She frequently points out the similarities of scientific film to works of avant-garde cinema, revealing historical ties among the science film, popular media culture and elite modernist art and film practices. Ultimately, Cartwright unveils an area of film culture that has rarely been discussed, but which will leave readers scouring video libraries in search of the films she describes.

*The Politics of Pictures* John Hartley.2017-09-25 *The Politics of Pictures* is a history of looking, from Aristotle to TV audiences, from the invention of photography to the meaning of picnics, from Leviathan to synchronised swimming, Dr Johnson to the sexualization of war. John Hartley's wide-ranging and sometimes bizarre journey of discovery looks for the public in the realm of media, where citizens are now literally represented on screen and

page. The book investigates popular media reality by showing how pictures and texts are powerful political forces in their own right, using a variety of primary texts to explore the way publics have been created, and exploring the political uses of media audiences. The unconventional approach is designed to show how popular reality looks to itself, and how its peculiar forms and connections actually challenge some venerable political and philosophical truths.

Unpopular Privacy Anita Allen. 2011-10-17 Can the government stick us with privacy we don't want? It can, it does, and according to Anita L. Allen, it may need to do more of it. Privacy is a foundational good, Allen argues, a necessary tool in the liberty-lover's kit for a successful life. A nation committed to personal freedom must be prepared to mandate privacy protections for its people, whether they eagerly embrace them or not. This unique book draws attention to privacies of seclusion, concealment, confidentiality and data-protection undervalued by their intended beneficiaries and targets--and outlines the best reasons for imposing them. Allen looks at laws designed to keep website operators from collecting personal information, laws that force strippers to wear thongs, and the myriad employee and professional confidentiality rules--including insider trading laws--that require strict silence about matters whose disclosure could earn us small fortunes. She shows that such laws recognize the extraordinary importance of dignity, trust and reputation, helping to preserve social, economic and political options throughout a lifetime.

## **Style-Architecture and Building-Art** Hermann

Muthesius.1994-12-15 *Style-Architecture and Building-Art* is Hermann Muthesius's classic criticism of nineteenth century architecture. Now published for the first time in English, this pivotal text represents the first serious effort by Muthesius to define the elements of early modernist architecture according to notions of realism and simplicity. Although Muthesius is known best in Anglo-American architectural literature for his studies of the English house, his scholarship constituted a wide-ranging modernist polemic emanating from the German realist movement of the late 1890s. Notions that were introduced in *Style-Architecture and Building-Art* became common in later modernist historiography: disdain for the nineteenth century's artistic eclecticism and lack of originality; appreciation of the material and industrial aspects of building technology, and, above all, a simpler approach to design. Muthesius' critique of stylistic architecture is not only linked to the development of the Deutsche Werkbund movement, but also can be viewed more broadly as a cornerstone of the modern movement. In his introduction, Stanford Anderson situates Muthesius and his work in turn-of-the-century architectural discourse and analyzes his vision of a new form of architecture. Anderson also discusses the rationale underlying the call for cultural renewal, the role of English architectural models in Muthesius's thought, critical differences between the first and second editions of *Style-Architecture and Building-Art*, the influence of the Jugendstil and Art Nouveau movements on Muthesius and, in turn, the influence of Muthesius on the Deutsche Werkbund movement.

**Sitte, Hegemann and the Metropolis** Charles Bohl, Jean-François Lejeune.2009-06-02 These essays, from leading names in the field, weave together the parallels and differences between the past and present of civic art. Offering prospects for the first decades of the twenty-first century, the authors open up a broad international dialogue on civic art, which relates historical

practice to the contemporary meaning of civic art and its application to community building within today's multi-cultural modern cities. The volume brings together the rich perspectives on the thought, practice and influence of leading figures from the great era of civic art that began in the nineteenth century and blossomed in the early twentieth century as documented in the works of Werner Hegemann and his contemporaries and considered fundamental to contemporary practice.
