Mega-Urban Development and Transformation Processes in Vietnam Frauke Kraas,Matthias Garschagen,Hoa Thu Le,Javier Revilla

Diez.2023-03-14 Since the beginning of the Doi Moi reforms, Vietnam's economy and society have been profoundly transformed. While in 1986 less than 13 million of Vietnam's inhabitants lived in areas classified as urban (20%), the number has risen to more than 30 million inhabitants today (35% of the total population). This massive urbanisation was made possible by the rapid transformation of the former agricultural state into an industrial and service state and extensive migration processes from rural areas to the fast growing cities and megacities. Fifteen articles analyse the current situation.

Möglichkeiten zur Einführung umweltschonender Bau- und Siedlungskonzepte im Wohnungsbau in China Longbin Zhu.2006-11-02 Die vorliegende Arbeit untersucht Umsetzungsmöglichkeiten umweltschonender Bau- und Siedlungskonzepte im Wohnungsbau in der Provinz Jiangsu (China) im Vergleich zu Deutschland. Vier umweltrelevante Aspekte im ökologischen Wohn- und Siedlungsbau werden betrachtet: Energie, Fläche/Boden, Wasser und Material. Neben der Baukonstruktion, Gebäude- und Siedlungstechnik werden Umsetzungen umweltschonender Konzepte in den verschiedenen Arbeitsfeldern der städtebaulichen Planung einer Wohnsiedlung auf der Quartierebene diskutiert. Die Schwerpunkte liegen dabei auf Bebauungsplanung, Verkehr, Freiraum und Gebäudegestaltung. Der Autor hinterfragt, ausgehend von Konzepten und Maßnahmen ökologischer Siedlungsprojekte aus Deutschland, wie weit diese auf den wenig umweltschonenden Wohnungsbau in China zu übertragen sind. Dies wird am Beispiel von vier Wohnsiedlungen in Jiangsu exemplarisch untersucht. Darauf basierend, werden Verbesserungsmöglichkeiten, anzupassende ökologische Zielsetzungen und Maßnahmen in der Planung von Wohnsiedlungen weiter analysiert. Die Ansätze aus der Untersuchung werden in einem Pilotprojekt der GTZ in Changzhou der Provinz Jiangsu angewendet und verifiziert. Als Schlussfolgerung werden Vorschläge erarbeitet, die nicht nur die Belange der Planer berücksichtigen, sondern vielmehr ebenso eine Hilfestellung für alle am Planungsprozess beteiligten Personen sein kann.

Diskurs - semiotisch Ernest W.B. Hess-Lüttich,Heidrun Kämper,Martin Reisigl,Ingo H. Warnke.2017-07-10 Der Band enthält Beiträge, die auf der 4. Jahrestagung des Netzwerks 'Diskurs - interdisziplinär' 2014 gehalten wurden. Der Fokus der Beiträge ist auf Diskurs als ein semiotisches Kohärenzphänomen gerichtet. Komplexe von Zeichensystemen, die aufeinander verweisen und miteinander Sinn konstituieren, werden in ihrer diskursiven Geprägtheit beschrieben. Im Sinn einer Diskurssemiotik werden diskursive Kodierungen und ihre mutuellen Beziehungen als Bedeutung schaffende Instanzen dargestellt. Diese werden beispielhaft in Bereichen wie der Ess-, Körper-, Bild- und Filmsemiotik, der Semiotik der Kleidung und des Internets, der Raum- und der Geosemiotik sowie der Musiksemiotik exemplifiziert. Der Betrachtung des multimodalen Zusammenhangs von Text, Bild und Ton kommt dabei ein hoher Stellenwert zu. Damit präsentiert der Band Beispiele interdisziplinärer Ansätze und gibt den aktuellen Forschungsstand diskurssemiotischer Diskussionen wieder.

The Work of Cepezed Architektenbureau Cepezed.2007 In the past few decades, cepezed has gained renown with transparent, sustainable and technologically progressive architecture that is remarkably usable and humane. Unaffected design, sober but stylish materialization, and careful finishing are just as characteristic of Cepezed's oeuvre as the integration of spatial and construction-technical aspects. The design and building processes at cepezed are also integrated: the use of prefab components and the application of industrial building methods guarantee an optimum

alignment of design and realization, in which time, quality, and costs are meticulously planned and controlled. Prototypes documents a large number of key projects and deals extensively with the various aspects of product development, building process and architecture. The layout and form of the book make it very similar to a cepezed design: celar, logical and efficient. It offers very incisive insight into the office philosophy that cepezed has drawn straight through architectural history. In addition to the timeless aesthetic pleasure that can be experienced in the designs and the craftsmanship displayed at detail level, the much-discussed role of the architect in the design process today is examined in the book. A must read for every architect who wrestles with the threatened depreciation of the discipline.

Sustainable Living Dominique Gauzin-Müller.2006 Since the 1992 Earth Summit in Rio de Janeiro, the concept of sustainability has come to the fore in the building industry as well as elsewhere. It requires the use of intelligent technology, innovative structures, ecologically sound materials, and environment-related energy management. This development is particularly vigorous in the residential sphere, since we now see a growing sensitivity to quality of life and accommodation: people increasingly insist on healthy indoor atmosphere, natural humidity balance, thermal comfort, and daylighting. This book offers a thorough and technically detailed documentation of 25 sustainable residential structures, both in the high-tech and low-tech domain. The individual projects differ greatly in size and in the materials used. The examples are chosen from 18 countries on all five continents and are located both in rural and urban areas.--BOOK JACKET.

Sustainable Logistics Wolf-Rüdiger Bretzke, Karim Barkawi.2012-12-14 Currently the notion of sustainability is used in an inflationary manner. Therefore the authors start with a definition which is stable to serve as an anchor for further research as well as for discussions among scientists, managers and politicians, ideally across different disciplines. The character of this book is purely conceptual. The argumentation is based on comparison of new and demanding requisites with existing models (process and network architectures in the field of logistics). Formerly neglected impacts on the environment will be included. Main features of a new approach will be developed which are capable to avoid these impacts and to align logistics with the requirements of sustainability. In order to make logistics sustainable large parts will have to be reinvented. The focus needs to be on decoupling transportation activities from economic growth rates.

The re-emergence of co-housing in Europe Lidewij Tummers.2017-10-02 Across Europe, the number of co-housing initiatives is growing, and they are increasingly receiving attention from administrators and professionals who hold high expectations for urban liveability. Is co-housing a marginal idealist phenomenon, or the urban middle class' answer to the current housing crisis? And has the development of theoretical insight and research kept up with the actual expansion of co-housing as a practice? These questions were raised during the first European conference on co-housing research, which took place in Tours, France, in March 2012. Both the conference and this book aim to move beyond case-studies, and to look more particularly at the implications and wider perspective of the current co-housing trend. Using the specific vocabulary of different disciplines and geographic regions, the contributions to this book analyse the underlying thinking behind, and the expectations projected on, diverse models of collaborative housing. The authors are aware of the qualities of contemporary co-housing, but they go beyond advocacy to investigate the conditions under which co-housing can be successful as a strategy for housing provision; can offer solutions for sustainable urban development; or indeed can contribute to involuntary or intentional gentrification. This book was originally published as a special issue of the Journal of Urban Research and Practice.

Nachhaltige Stadtentwicklung im beginnenden 21. Jahrhundert unter den Bedingungen Agenda 21-typischer Prozesse Georgios Tsakalidis.2008

The Exhibition Wolfgang Fiel.2014-11-18 Vorarlberg ist das westlichste und flächenmäßig kleinste Bundesland Österreichs, grenzt an Süddeutschland, die Schweiz und das Fürstentum Liechtenstein und hat etwas mehr als 375.000 Einwohner. Die Landeshauptstadt Bregenz liegt am Bodensee. Das Land kann auf eine besondere baukulturelle Entwicklung zurückblicken, die ihren Ausgang in den späten 1950er, frühen 1960er Jahren genommen hat und unter der Bezeichnung „Vorarlberger Bauschule“ weit über die Landesgrenzen hinausbekannt geworden ist und bis in die Gegenwart zu einer vergleichsweise hohen Dichte qualitätvoller Architektur geführt hat. Vom 13.September. bis 11. Oktober 2014 zeigte der Werkraum Bregenzerwald die Ausstellung welche als wandernder Showcase konzipiert ist und anschließend weltweit in den Österreichischen Kulturforen gezeigt wird. Die Publikation dokumentiert die Ausstellung in ihrer finalen Form.

Tops und Flops, Mythen und Hypes im automobilen Marketing Armin Schirmer.2024-06-09 Das Buch analysiert und pointiert Tops und Flops im Marketing der Automobilindustrie sowie aktuelle Mythen und Hypes von der Klimawende über die Verkehrswende bis zu Carsharing und dem ‚Purpose‘ von Automobilunternehmen. Zahlreiche Fotos, Abbildungen und Tabellen machen das Ganze anschaulich.

Analyse und Potenziale der Digitalisierung und Standardisierung für das strategische Management in Kommunalverwaltungen Kai Petersen.2023-06-07 Die Herausforderungen der Kommunen und die Notwendigkeit eines strategischen Managements werden beschrieben. Der Einfluss von Nachhaltigkeitskonzepten wie der Agenda 2030 mit ihren SDGs sowie der erweiterten Perspektiven der Digitalisierung auf standardisierte Informationsbeschaffung, datenbasierte Steuerung und die Kommunikation der Akteure werden dargestellt und skizzieren den Forschungsstand. Es existierten jedoch Forschungslücken. Einerseits ist ein empirisches Defizit hinsichtlich der genutzten Konzepte, der Daten- und Informationsquellen und der Systeme in den einzelnen Phasen des strategischen Managements zu verzeichnen, andererseits fehlen Grundlagendaten über die Verknüpfung eines zielorientierten strategischen Managements mit der Agenda 2030 als bedeutendem Nachhaltigkeitskonzept. Möglichkeiten der Standardisierung und Digitalisierung für den strategischen Managementprozess in Kommunen stehen bisher nicht im Fokus der wissenschaftlichen Betrachtung. Letztlich besteht eine empirische Lücke in Bezug auf die eingeschätzten Potenziale digitaler Informations- und Steuerungssysteme für die Wirtschaftlichkeit und das Zusammenwirken der verschiedenen Akteure. Ziel dieser Dissertation ist es, die Auswirkungen der Digitalisierung und Standardisierung auf die strategische Steuerung von Kommunen zu analysieren, zu bewerten und Gestaltungspotentiale zu beschreiben.

Politics of Learning, Politics of Space Tom Holert.2021-02-22 How the relationships between education and outer space have developed historically is exemplified in an incisive way by the decades that followed the Sputnik shock of 1957. The wake-up call that resulted from the Soviet space program set the global landscape of learning in motion. New schools and universities came into being against the backdrop of the reform euphoria and mood of catastrophe. At the same time, traditional pedagogical concepts were severely called into question—including the call to do away with institutions of education. What is shown in the architectures of learning is not only a politics of space, but also the educational shock that intensively shook up the global societies of the 1960s and 1970s, while they were gradually being transformed into knowledge societies.

Nachhaltige Wohngebäudesanierung in Deutschland und China Ji Zhang.2015-04-27 Ji Zhang behandelt die Erfahrungen der nachhaltigen Wohngebäudesanierung in Deutschland und diskutiert ihre Übertragungsmöglichkeiten auf China. Während die Sanierung von Wohnbestand in Deutschland schon weit entwickelt ist, steht sie in China noch am Anfang. Die Autorin gibt zunächst einen kurzen Überblick über die Rahmenbedingungen in beiden Ländern, dann analysiert sie 31 herausragende Berliner Sanierungsprojekte, aufgeschlüsselt nach den fünf Teilaspekten Energie, Wasser, Grün, Baustoffe und Attraktivität. Mittels energetischer Simulation eines Referenzgebäudes und Diskussionen überprüft Ji Zhang die Übertragbarkeit der in Deutschland angewendeten Maßnahmen auf die Hot Summer Cold Winter Zone in China.

Affordable Living Klaus Dömer, Hans Drexler, Joachim Schultz-Granberg. 2014 This book presents not only theoretical approaches but also strategies for creating affordable living spaces. These strategies can be compared by analyzing projects in their economic, social, and urban development contexts. The central question is: how can different approaches for creating affordable residential space be applied and translated to other contexts? -Page 4 of cover.

Resilient City Elke Mertens. 2021-11-22 Climate change is one of the major challenges facing cities in the future. Landscape architecture is particularly in demand here because it offers solutions that are characterized by complexity and interdisciplinarity and contribute to the quality of everyday life. These range from green roofs and facades to urban gardening and the landscaping of large-scale protection works. This volume presents measures and plans of eleven major cities in North and South America, from Vancouver to Rio de Janeiro, to protect their inhabitants and their habitats against future storms, floods, landslides or long periods of heat and drought. Outstanding projects in the featured cities are analyzed in their geographic and climatic context. The author also addresses the social and cultural dimensions of resilience.

Urban Sustainability Transitions Niki Frantzeskaki, Vanesa Castán Broto, Lars Coenen, Derk Loorbach. 2017-06-14 The world's population is currently undergoing a significant transition towards urbanisation, with the UN expecting that 70% of people globally will live in cities by 2050. Urbanisation has multiple political, cultural, environmental and economic dimensions that profoundly influence social development and innovation. This fundamental long-term transformation will involve the realignment of urban society's technologies and infrastructures, culture and lifestyles, as well as governance and institutional frameworks. Such structural systemic realignments can be referred to as urban sustainability transitions: fundamental and structural changes in urban systems through which persistent societal challenges are addressed, such as shifts towards urban farming, renewable decentralised energy systems, and social economies. This book provides new insights into how sustainability transitions unfold in different types of cities across the world and explores possible strategies for governing urban transitions, emphasising the co-evolution of material and institutional transformations in socio-technical and socio-ecological systems. With case studies of mega-cities such as Seoul, Tokyo, New York and Adelaide, medium-sized cities such as Copenhagen, Cape Town and Portland, and nonmetropolitan cities such as Freiburg, Ghent and Brighton, the book provides an opportunity to reflect upon the comparability and transferability of theoretical/conceptual constructs and governance approaches across geographical contexts. Urban Sustainability Transitions is key reading for students and scholars working in Environmental Sciences, Geography, Urban Studies, Urban Policy and Planning.
